18th January, 1944.

Director of Education.Subject :- Schools.

I have been instructed to proceed with the design of certain school buildings.

2. First there is the question of the completion of the 5 remaining schools in the "Ten Town Schools" programme of 1937. May it be assumed that the design of the buildings already constructed for this programme will, with certain small modifications be satisfactory and may serve as a typical design for such schools in hill and in built up areas?

It is believed that you have a site at Haifa (Touma), and if this design is in general satisfactory an adaptation of it could be prepared for this site.

It would, I suggest, be useful also to prepare a typical design for a plains type school, which could serve as a model for buildings on various sites in the plains. It is understood that you have ready your ideas on this subject and I have requested Mr. Foster-Turner, Architect to get in touch with you and prepare sketch plans of such a building.

Subject : Defence Regulations, 1939 -
Building Licences and release of controlled
materials for School Buildings.

P.W.D.H. Qtr. Jerusalem

In accord with the Acting Director of Public Works and this Department, the Director of Education issued Instruction No.3551/10/PE, dated 10.11.43, to his District Inspectors and, on my request, sent copies of same to all Building Authorities.

May I point out that this Instruction refers to new school buildings or to the extension of existing buildings, but not to repairs.

It has been agreed upon between the Director of Education and this Department that repairs of buildings should be dealt with by the Building Authorities in the same manner as other repairs, i.e. they may at their discretion release up to 5 bags of cement, and refer to this Department applications for repairs requiring more cement and/or materials.

They may further ask the District Inspectors of the Department of Education for recommendation, but they need not submit the applications through the Director of Education's Headquarters.

6 copies to Director of Education,

Subject :- Controlled Material for Government School Buildings.

Reference:- My No. 3551/10/PE of 10.11.43.

The procedure outlined in paragraph (A) of my letter under reference refers to the release of controlled material for new buildings only.

2. In the case of controlled material required for repairs to Government Village school buildings owned by Local Education Authorities applications should continue to be submitted by District Inspectors of Education through the Building Authorities.

3. The release of cement for repairs not exceeding 5 bags may be made by Building Authorities on the recommendation of District Inspectors of Education without reference to this office.

4. Applications for quantities of cement exceeding 5 bags and for other controlled material needed for repairs require the recommendation of the Director of Education.

5. For your convenience I append below a list of Building Authorities to whom I am forwarding a copy of this letter.

I attach copy of letter No.22/1 of 13.10.43 from Controller of Heavy Industries in reply to my No.3551/10 of 7.10.43 to which your letter under reference also refers.

2. It will be noted that in para.1 of the attached letter the collaboration of Building Authorities, so far as Government school buildings are concerned, is not necessary, ^{and} in view of your offer of the services of District Engineers in preparing Bills of Quantities of controlled material, which is most welcome, I now suggest the following procedure which I trust will meet with your approval.

(a) On receipt of application from a D.I.E. the District Engineer will prepare a Bill showing the quantities of controlled materials only, required to erect a room or building in accordance with the Standard Type Drawings for schools prepared by your Department and agreed to by me.

(b) The District Engineer will then transmit the Bills of Quantities to the District Inspector of Education who will

P.T.O.

forward them to this Department for transmission, with my recommendations, to the Controller of Heavy Industries.

3. In view of the preparation of the revised type plan for village schools No.B/1658 (your No.3 of 9.9.43 refers) which may require additional cement for strengthening, I shall be obliged if the list of controlled material referred to in your letter No.3 of 13.5.43 may be revised if necessary. It should include an additional item showing the quantity of cement you consider necessary for a built-in blackboard.

Specifications of the blackboard constructed for the 'Umariya Boys' School, which has proved satisfactory, is attached in case you require it for reference.

No.22/1

CONTROLLER OF HEAVY INDUSTRIES
AND
DIRECTOR OF WAR PRODUCTION
JERUSALEM

DIRECTOR OF EDUCATION.

13.10.43.

Subject :- Defence Regulations, 1939.
Controlled Materials for Government
School Buildings.

Reference:- Your 3551/10 of 7.1.43.

Your letter under reference has been discussed between Mr. Tomlinson of your Department and the undersigned, and the following agreement has been reached:

(i) As far as schools are to be considered as Government Schools, no Building Permit (to be issued by the Building Authority) and no Building Licence (to be issued by this Department) is necessary, and therefore the collaboration of the Building Authorities for the release of controlled materials is not needed.

(ii) In cases where schools are not to be considered as Government Schools, but where Government is defraying part or the whole of the cost for construction, a Building Permit to be issued by the Building Authorities may be necessary, but in any case no Licence under the Defence (Amendment) Regulation (No.9), 1942, published in Supplement No.2 to P.G. 1203 of 22.6.42 is required.

2. In all these cases the Director of Education will satisfy himself that the quantities of materials asked for are the minimum quantities and cannot be replaced by other materials, and he will,

P.T.O.

when submitting applications for the release of materials to this Department, mention that he recommends the release under the War Supply Board Rules.

3. In cases where schools cannot be considered as Government Schools, or where Government is not defraying any of the cost, then the Director of Education will give his recommendation on form COM 54 and advise applicants to submit their applications for construction or completion of school buildings, or for repairs, through the Building Authorities concerned.

4. Applications with regard to the release of materials for furniture will have to be submitted by applicants to the Director of Education who will pass them to this Department with his recommendation.

5. The Director of Education will immediately inform the District Commissioners, Regional Engineers, Public Work Department and other Authorities concerned of the new procedure agreed upon.

SPECIFICATIONS FOR MAKING BLACKBOARDS
(Obtained from P.W.D. - Mr. Wanetick - on 5.8.41)

Keene's Cement and lampblack to be mixed dry in the proportion of 20 (Keene's Cement) : 1 (lampblack). Water should be added in sufficient quantity for immediate use only, the mixing to be done in small batches. Immediately after plastering is finished, paint one coat of lampblack and linseed oil. Putty down with mixture of varnish (good quality) and whiting and rub down. Paint with two coats of black oil paint with an extra dose of drier (Turpentine etc.). Then finish with one or two coats of blackboard paint. (Taffel Lack).

To prevent cracking, Mr. Wanetick suggested putting a wire net two cms. mesh. This is advisable but not necessary.

If Keene's Cement is not available, ordinary Nesher Cerent may be used mixed with 10% of well slaked lime. Great harm will be done if lime is not completely ~~asked~~ ^{slaked}.

Thickness of blackboard when finished is 2 cms.

Height of lower edge of blackboard from floor =	90 cms.
Height of Blackboard	110 "
Width of wooden frame round blackboard.....	6 "
Width of shelf for chalk	6 "

N.B. Blackboard extends from one end of the wall to the other.

Industries with copy to me.

The procedure with regard to the erection of school buildings so far as this Department is effected is laid down in my letter No.3 of 4.1.1943 to District Engineers. This procedure was agreed to by you, your No.1640/PE of 7.12.42 to the Chief Secretary, and the Chief Secretary's letter No.F/851/29/40 of 12.1.1943 refer.

2. In order to assist you for the period that certain materials are controlled I am prepared to agree that on receipt of an application from a District Inspector of Education the District Engineer will prepare a Bill shewing the quantities of controlled materials only, required to erect a room or building in accordance with the Standard Type Drawings for Schools prepared by this Department and agreed to by you.

3. The District Engineer will then transmit the Bills of Quantities to whoever you and the Controller of Heavy Industries may decide should be the recipient, i.e. the District Inspector of Education, or the Regional Engineer for the Town Planning Adviser, etc.

P.T.O.

4. It is advisable that if the Controller of Heavy Industries requires the Bill of Quantities of Controlled Materials presented in any particular form he should provide me with a pro-forma shewing his requirements as soon as you and he have agreed upon procedure.

5. The District Engineer will prepare the Bill of Quantities only and cannot undertake to provide any information regarding sources of supply of the controlled materials.

6. I presume I shall hear further from you in due course.

No. 1640/PE

24 September, 1943.

Director of Public Works.

Subject :- Standard Village School Plan
(Vaulted).

Reference:- Your 3 of 9.9.43.

I now return the revised plan B/1658 for a three classroom village school building duly signed.

2. You will see that Note 4 regarding the prevailing wind has been amended to accord with existing departmental practice and instructions.

3. It has been found that with windows on both the north and south sides of the classrooms there is almost always sufficient cross ventilation whatever the direction of the wind if the windows are fully open. When the wind is directly "abeam", the windows in practice have to be shut to keep papers from blowing off the desks and the object of cross ventilation is thus defeated.

4. A further and important reason for having the verandah on the south side is that with this orientation the sun never shines directly into the classrooms and shutters or sunblinds can be dispensed with. Bars are required for protection against thieves and glass windows for protection against rain. Blackboards should be built in to the east wall of each classroom.

in L. as written
for this 9?
Mr. Amin: R. 2*

Subject:- Expenditure on
Government Schools
in the financial
year 1942-43.

*Mr. Amin: R. 2
PE expenditure
last 10/00*

I shall be obliged if
you could give me a statement of
the amounts spent on Government
Schools in the period 1.4.42-
31.3.43 in respect of:-

- (a) recurrent expenditure,
including rents;
- (b) non-recurrent expenditure.

The expenditure under
(b) should be itemised in order
to distinguish sums spent on
urban schools under the original
Loan Scheme from other Major
Works.

PUBLIC WORKS DEPARTMENT
JERUSALEM.

9th September, 1943.

Director of Education,

Subject :- Village Schools - type plan.

Reference:- Your 1826/182 of 7.8.43.

I attach a print of a revised plan for the above. This is similar to the previously approved plan JM/3179 but is considered more suitable for its purpose.

2. The legend on the plan is important and shows that it is suitable for one storey buildings only and that the walls and piers might require thickening for workmanship of inferior quality.

3. It is considered that two storey buildings should not be built under the conditions proposed for village schools, which should be sited so as to be able to extend laterally rather than vertically. It will seldom be possible to omit steel and R. concrete from such a building, which parts of the work would require more experienced supervision than is at present proposed.

It is intended however, where a suitable plan for one-storey buildings has been decided upon, to produce a two-storey plan from which the upper storey could be omitted (not a one-storey plan to which a second storey could be added) but it must be realized that this will be of more expensive construction and in its specification will have certain requirements not always easy to fulfil.

4. Will you sign and return the attached plan if satisfactory; further detail drawings of a similar type for doors and windows will then be prepared together with a brief specification.

S.A.

Will you please take over & produce suitable standard plans on the basis of J.M./3179 & 3180 attached, & detail plans J.M. 3110, 3254 & 3255.

The thickness of walls & piers depends of course upon workmanship, which cannot be guaranteed from job to job, therefore many dimensions must be shown minimum as on the present plans.

An indication might be given as to how access to the central end floor is to be provided.

2 Since the plans are for the use of billagars, generally without very skilled supervision, simplicity & clarity are more important than the detail now being by Royal P.W.D. standards.

(5)

Revert the drawing for the single stoney type. As discussed, a design for the ground stoney of what may become a ^{two} stoney type is now in hand.

2. In my view, a 2-stoney type is not required and should not be encouraged in villages. There is always ample ground available and expansion should be lateral and not vertical. A single stoney type is more fitting and practical and would be more satisfying aesthetically.
3. I presume you will say how many units you want.

July 8
9.

(6)

D.P.W. I have had this plan prepared in preparation for a possible room in school building. This will follow.

It will supersede a not so clear plan by design: how used is "Standard"?

2. Do you approve?

(7)

A.D.(2) Yes approved for a 3 class room type but S/Educⁿ may have views? Has to be consulted. Great care must be taken before we let it down with S/Educⁿ & the locals to ~~that~~ emphasize that it cannot be used for a one room type, to be added to later, by knocking off the end rooms, or for a 2 room type by omitting one end room. That is what they did before & blamed the P.W.D. indirectly

JERUSALEM.

No. 1820/PE

7 August, 1943.

Director of Public Works.

10.9.43 (2)

Subject :- Construction of School Buildings.

Reference:- Your No.3 of 28th July, 1943.

219

In April 1942 drawings No.JM/3179 and 3180 were redesigned by you to incorporate heavier corners as local masons had declined to be responsible for the stability of buildings constructed with the dimensions of the corners shown in the previous plan.

2. Since then buildings have been constructed to the revised plans but in some localities fear is still expressed that the walls and corners are not sufficiently thick and it has been recommended to me that local masons may be permitted to increase the dimensions of walls and corners shown in the plan if necessary. If you agree to this proposal drawings No.JM.3179 and 3180 may be confirmed as a type plan.

Director of Education.

u-34/61/1

Subject : Construction of Schools.

Reference: Your 511/4 of 7.7.43 to District Engineer, Nazareth forwarded by him to me.

You will recollect a certain amount of discussion took place formerly on this subject, culminating in an agreed basis of procedure, my No.3 dated January 4th, 1943, Secretariat reference No. TF/851/29/40.

202

2. Will you now say whether the proposed works are to be classified under heading (a) of this circular "Local Council areas", or in the category of "Village Schools", or neither, in which case the buildings would be constructed by this Department under normal Governmental procedure.

3. If you propose them under heading (a) then I would draw your attention to sub para. (1) of the circular requiring application for the design (and therefore also for an estimate of the cost) to be submitted by you to this office.

4. If you propose them for normal construction you have already a rough guide for the cost of the works at Beisan on a pro-rata basis and for Safad, which prices should be increased by 60% to cover subsequent rise in costs.

I assume of course that you would be adopting similar plans as in 1941/42.

5. For construction to village standards you could for preliminary estimate omit this 60%. I would inform you that rough construction

P.T.O.

"temporary" buildings with normal amenities cost today some LP.7.000 per square metre.

6. The above will give you the preliminary information necessary to judge whether it will be necessary for you to comply with G.R.318 B(a). In my opinion it is likely that it will be so necessary.

7. It will save time, I suggest, if correspondence on this subject for the present continues between our own offices.

2. With regard to the quantity of cement 500 kg is what is required for making a good job.

However, I have discussed the matter with the office of the Controller of Heavy Industries and it appears that under the present circumstances 150 kg can be allowed for bedding the tiles.

In your letter under reference you were good enough to furnish me with estimates of the quantity of timber considered necessary for 5 windows and 1 external door of a standard size, vaulted roof, classroom.

2. The Controller of Heavy Industries is prepared to release Katrani timber for this purpose but first requires detailed information as to the quantity of each size of scantlings, boardings, etc. for the windows and door of the classroom in question.

3. I shall be obliged if you will kindly furnish me with this additional information.

4. Will you also be good enough to confirm the quantity of cement given in your letter under reference necessary for laying tiles in one classroom, viz. 0.50 tons.

The Controller of Heavy Industries has commented on this figure and observes

P.T.O.

that he has been allowing 0.15 ton
for a room of 50 m² floor area, i.e.
3 kilos per m².

Reference:- Your No.22 of 2nd February 1943.

P.W.

The quantities of controlled materials
 required for the purpose mentioned in my letter
 No.3551/7 of 29.1.43 are estimated by the Director
 of Public Works as follows:-

<u>Quantities for one room</u>	<u>Quantities for</u>
	<u>30 rooms.</u>
<u>Timber.</u> Five windows 0.50 m ³	15 m ³
One external door 0.15 m ³	4.50 m ³
<u>Cement.</u> For laying tiles 0.50 tons	15 tons.

2. Regarding para. 2 sub-para.1 of your
 letter under reference the Director of Public Works
 informs me that plywood is not considered suitable
 for external doors and considering the small quan-
 tity of timber estimated for this purpose I shall
 be obliged if Katrani timber may be substituted
 for plywood.

3. It should be noted that this material
 will be required only in small quantities from time
 to time covering a period of some months.

Chief Secretary.

Subject:- Construction of School accommodation. 212

Reference:- Your F/851/29/40 of 15-3-1943.

I regret I do not know on what aspect of the matter my comments are required, as

- (a) the procedure as between the Department of Education and this Department has been laid down and approved,
- (b) funds are available, and
- (c) the Controller of Heavy Industries has agreed to release the controlled materials necessary for the execution of the work.

2. In the circumstances it seems that all that is necessary is for Government to decide whether the work should or should not proceed.

Now I do not know on what aspect my comments are required. It appears now to be solely a matter for decision by Govt. whether the work is to proceed. The funds are there, the materials will be available, this Dept. can do whatever it has to do under the approved arrangements for PWD assistance, the D/E dueⁿ appears to be in a position to go ahead. All that is necessary is for someone to give a decision that the work is or is not to proceed & it is not for D/PW to say that. Reply on these lines.

CHIEF SECRETARY

Subject :- Construction of School Accommodation.

Reference:- Your No.F/851/29/40 dated 5th February, 1943.

Since the order for the control of building materials came into force new classrooms for Government schools have been constructed, where possible, in accordance with the conservative local Arab (vaulted roof) style, thus dispensing with the use of iron and cement for the construction of the roof.

2. The only controlled materials required in the case of the four schools now in question are small quantities of timber for windows and doors and cement for laying tiles. These the Controller of Heavy Industries has agreed to release.

3. The Local Education Committees concerned have all agreed to undertake construction of the classrooms with the amounts provided by Government, to which reference is made in my letter No.1640 of 29th January, 1943, and have assured me that transport presents no difficulty. Animal transport can be used.

4. School furniture for the classrooms in question is available in stock.

5. In consequence I shall be obliged if your authority may now be given to start work on the construction of these additional classrooms which are urgently required.

P.T.O.

6. Since the grants approved by Government for these projects have not yet been paid to Local Education Committees, I shall be obliged if your approval to start work may be given without delay so that payment can be made before the 31st March 1943 and work commenced at once.

Reference:- Your 337/35/1 of 1-9-1942.

Your above mentioned letter, read in conjunction with your 3317/55/1 of 12-2-1943, leaves me in some doubt why Government funds should be used to maintain the above mentioned School. There seems to be no formal agreement about the use of this building as a school and I am reluctant to spend money on the maintenance of non-Government property under such circumstances.

2. Furthermore, I understand, that in some instances the responsibility for the upkeep of school buildings, is being handed over to the Local Education Authorities. Cannot such a School as this be treated in a corresponding way?

Subject :- Release of Controlled Materials for Schools.

I am in communication with Controller of Heavy Industries on the subject of release of controlled materials for vaulted roof classrooms for schools.

2. The Controller of Heavy Industries is willing to give favourable consideration to the release of Katrani timber for windows, plywood for doors and a small quantity of cement for fixing tiles and requests information as to the quantities required.

3. I shall be obliged therefore if you will kindly furnish me with details of quantities of controlled material, referred to in para.2 above, considered necessary for a vaulted roof classroom.

Dimension of windows, door and floor space are:-

- (a) 5 windows 1.00 x 1.50
- (b) 1 outside door 1.00 x 2.50
- (c) Floor space 7 x 7 ms. (amount of cement for fixing tiles only required)

responsibility for the actual
of the work and that the inspections
at the authority responsible for
and provide information as to any defects
have been observed during the inspection.
The frequency of the inspections must be governed by the
scope of the work, and the inspecting staff available and
to the discretion of the District Engineer, but even
the smallest works there should be a minimum of three
sections during construction, (of which one should be when
conditions are being put in and another when the roof is
be constructed).

(vi) The above instructions relate only to the construction
accommodation, i.e. new buildings or additions to existing
buildings, and no inspections in connection with other works on
roads such as repairs, improvements, etc. need be undertaken
the Department of Public Works. Requests from District
Inspectors of Education for inspections in connection with the
erection of buildings should, however, be complied with.

(b) Village Schools.

The instructions contained in Director of Public Works
Letter No. 3/8 of 8-8-1955, a copy of which is attached, remain
unchanged and should be strictly adhered to in future. In view
however, of the above, these instructions will henceforth apply
only to schools in villages having no local council. Inspecting
officers should, however, make written reports to the
District Engineer after each inspection, in a similar manner to
those for buildings in municipalities and local council areas,
and any defects reported in the same manner.

5/8.

Engineer in Charge,
Nazareth District.

171 - 3/8/35
Subject:- Village Schools.
Reference:- Your 1/9/16 of 23-3-1935.

The procedure in connection with above should be as follows :-

- (a) Bills of quantities, estimate and complete specification should be made out by you and should be handed to the local representative of the Education Department together with a simplified form of contract. The D.I.E. will arrange for translation into Arabic if considered desirable and will call for tenders including any contractors recommended by you.
- (b) Tenders to be delivered at your office and to be adjudicated by local tenders board at which D.I.E. and Chairman Local Education Committee will attend.
- (c) D.I.E. will thereafter arrange for the signature of the contract by the contractor and the Chairman of the Local Education Committee and will inform contractor that, as soon as foundations have been excavated and all rolled joists, cement, sand and lime required for the completion of the building have been accumulated the P.W.D. will make their first inspection.
- (d) When making this inspection you or your representative should pay particular attention to foundations, size of joists, quality and quantity of material accumulated on site.
- (e) To reduce the chances of your having to pay more than one preliminary visit to the site you should instruct the D.I.E. as to the type of foundation which you are prepared to pass, give him a list showing the number and size of joists necessary and the quantity and quality of the remaining materials required and he should then endeavour, as far as he is able, to see that such conditions are fulfilled before he asks you to make the first visit.
- (f) During the course of construction a minimum of one visit should be made by you or your representative and the quality of the work checked.
- (g) As soon as the D.I.E. reports to you that the building is completed and the final claim has been received from the contractor, an inspection should be made and, if work has been satisfactorily completed, so far as can be ascertained, you should certify the bill to this effect and state the amount due to the contractor.

ON HIS MAJESTY'S SERVICE

MAJESTY'S SERVICE

January 4, 1948.

District Engineer, Jerusalem District.
 " " Jaffa District.
 " " Haifa District.
 " " Nazareth District.
 " " Nablus District.

Subject:- Construction of school accommodation.

The following procedure will be adopted in future for the construction of school accommodation in (a) Municipal and Local Council areas (excluding Jerusalem, Haifa, Tel Aviv and Jaffa) and in (b) villages other than villages having local councils.

(a) Municipal or Local Council areas (excluding those of Jerusalem, Haifa, Tel Aviv and Jaffa).

(i) Applications for the preparation of designs will be made by the Director of Education to the Director of Public Works.

(ii) The designs will be prepared at P.W.D. H.Qrs. unless in any special case specific instructions are issued by the Director of Public Works to the contrary.

The project which will comprise drawings and a short specification will be forwarded by the Director of Public Works to the Director of Education. A copy will also be sent by the Director of Public Works to the District Engineer concerned, and the latter, if requested by a District Commissioner or his representative, acting on behalf of the Municipality or Local Council, will give advice regarding the contractors to be invited to tender for the work.

(iii) In the event of funds being required by the Director of Public Works to meet the cost of preparation of the project, the Director of Education will ensure that such funds are placed at the disposal of the former.

(iv) Tenders for the execution of the work will be invited by the Municipality or the Local Council and the District Engineer will advise, on behalf of the Director of Public Works, as to the acceptance of tenders. In the event of the advice of the District Engineer not being accepted no responsibility will rest with the Public Works Department.

(v) The District Commissioner or his representative on behalf of the Municipality or Local Council will furnish the District Engineer with a copy of the contract and will advise him of the date on which the work is due to commence.

(vi) The District Engineer will arrange for inspections to be made from time to time during the construction but the responsibility for supervision and construction will rest with the Municipality or Local Council concerned.

Written reports of all inspections must be made to the District Engineer by the inspecting officer. These reports should include matters such as adequacy and suitability of the supervising staff employed, execution of work according to plans and specifications, the use of materials according to specifications, and general remarks. When inspections are made by the District Engineer personally a written record will be made.

If any report of an inspecting officer discloses any shortcomings in the work, the District Engineer must, even if he has already done so previously, immediately advise the District Commissioner or his representative, with copy to the Director of Public Works, of the defects, giving the date of the inspection. No reports need be sent to the District Commissioner or his representative or the Director of Public Works if the work is proceeding satisfactorily, but they must be filed for record purposes. In this connection it should be clearly understood that the Department

Assistant District Commissioner's Office,
Tulkarm.

REGISTERED

28th December, 1942.Director of Land Settlement,
Jerusalem.Registration of Turkish Ma'aref properties
in the name of the Local Education Authority.

Referring to your letter No. SD/34 of the 14th of October, 1942,

--- I forward a completed handing over certificate and key plan in respect of the following State Domains which were handed over on the 23rd of November, 1942 :-

- a) State Domains Nos D/Tul/78, 79, 80, 81, 82, 83, 84, 85 & 99.
- b) State Domains Nos D/Tul/94, 95, 96A, 96B, 97 & 98.

2. AS regards State Domain No. D/Tul/100 (Secondary Boys School) the District Engineer reported that it was not possible to prepare the schedule of conditions owing to occupation by the Military. The Commanding Officer has since informed me that he would have no objection to inspection by representatives of the District Engineer and Local Education Authority.

Department of Chemistry
Chicago, Ill.
June 10, 1931
Prof. J. H. Duerksen
Chicago, Ill.

Dear Sir:
I have the honor to acknowledge the receipt of your letter of June 7, 1931, in relation to the matter of the purchase of a certain quantity of material for the use of the Department of Chemistry, University of Chicago. The material in question is of a nature which is not ordinarily stocked in the Department, and it is necessary to order it from a special source. I am sorry that I cannot give you a more definite answer at this time, but I am sure that the material will be secured for you as soon as possible.

Very truly,
J. H. Duerksen
Chairman, Department of Chemistry

Enclosed for you are the bills for the material ordered.

Very respectfully,
J. H. Duerksen

Subject : Construction of Schools.
Reference: Your TF/851/29/40 of 17.12.42.

The Director of Education's requirements may I think ~~be~~ be incorporated more conveniently in the draft instructions as follows :-

- a) by adding the words "of which one should be when the foundations are being put in and another when the roof is being constructed" at the end of the last sub-paragraph in paragraph (a)(vi).
 - b) by adding "Requests from District Inspectors of Education for inspections in connection with the safety of buildings should however be complied with" to para (a) (vii).
2. I have no objection to the other proposals of the Director of Education.

I presume you will now inform me whether the instructions may be issued to the District Engineers of this Department.

IN REPLYING TO THIS
LETTER PLEASE QUOTE
THE DATE AND REFER-
ENCE NUMBER.

CHIEF SECRETARY'S OFFICE,
JERUSALEM.

/851/29/40

17 December, 1942.

Director of Public Works.

I am directed to request
that you will furnish me with
your comments on the Director of
Education's letter No.1640/PE
dated the 7th December, 1942,
on the subject of the construc-
tion of schools addressed to me
with a copy to you.

no. 1640/PE

REPLIED *190* 19/12.

5/1/33

17th December, 1942.

187

Director of Land Settlement,
Jerusalem.

I refer to paragraphs II and 12 of the report of the State Domain Committee on Ma'aref Properties dated 19th June 1942 in which it was agreed that State Domain properties occupied by public schools should be registered in the name of the Local Education Authority concerned and maintained by that authority. The Director of Education's letter 2442/14 of 5.9.42 to the Chairman, Central Housing Committee, and paragraph 2 of my letter 5/1/53 of 28th October 1942 to you also refer.

2. The following State Domain properties in Acre town are occupied by Government educational institutions:-

D/Acre/39 Govt. Secondary Boys' School.
D/Acre/1(19) Govt. Girls' School.
D/Acre/1(4) Hostel for Boys of Govt. elementary and secondary boys schools.

3. The Local Education Committee has been reconstituted and has succeeded in rousing some interest by the Municipal Council in educational matters. Indeed the Council has passed a resolution to impose an education rate (3% of annual rental of occupied buildings and lands in accordance with section 102(c) of the Municipal Corporations Ordinance) with effect from 1st April 1943 and to devote part of the proceeds towards the maintenance of the above mentioned institutions. In the circumstances I recommend that these three State Domains be registered in the name of the Local Education Authority and handed over to that authority by the Public Works Department on 1st April 1943.

4. I shall be glad to know Government's final decision in the matter of the Ma'aref properties in the old town of Acre (paragraph 3 of my letter 5/1/33 to you refers).

I suggest the following additions to the draft instructions:-

Para. (a)(vi) end.

Add:- So far as possible inspections should be made

- (a) when the foundations are being put in
- (b) when the roof is being put on, especially in the case of vaulted roofs.

Para. (a)(vii) end

REFERRED TO *[Signature]*

Add:- When however the safety of a building whether under construction or already completed is in doubt, inspections should be made at once on urgent request by the District Inspector of Education.

P.T.O.

After "District Commissioner" throughout the draft add
"or his representative", i.e. Asst. District Commissioner
or, more rarely District Officer.

Subject : Construction of school accommodation.

The following procedure will be adopted in future for the construction of school accommodation in (a) Municipal and Local Council areas (excluding Jerusalem, Haifa, Tel Aviv and Jaffa) and in (b) villages other than villages having local councils.

(a) Municipal or Local Council areas (excluding those of Jerusalem, Haifa, Tel Aviv and Jaffa).

(i) Applications for the preparation of designs will be made by the Director of Education to the Director of Public Works.

(ii) The designs will be prepared at P.W.D. H.Qrs. unless in any special case specific instructions are issued by the Director of Public Works to the contrary.

The project which will comprise drawings and a short specification will be forwarded by the Director of Public Works to the Director of Education. A copy will also be sent by the Director of Public Works to the District Engineer concerned, and the latter, if requested by a District Commissioner ^{or his representative} acting on behalf of the Municipality, or Local Council, give advice regarding the contractors to be invited to tender for the work.

(iii) In the event of funds being required by the Director of Public Works to meet the cost of preparation of the project, the Director of Education will ensure that such funds are placed at the disposal of the former.

(iv) Tenders for the execution of the work will be invited by the Municipality or the Local Council and the District Engineer will advise, on behalf of the D.P.W., as to the acceptance of tenders. In the event of the advice of the District Engineer not being accepted no responsibility will rest with the Public Works Department.

(v) The District Commissioner ^{or his representative} on behalf of the Municipality or Local Council will furnish the District Engineer with a copy of the contract and will advise him of the date on which the work is due to commence.

(vi) The District Engineer will arrange for inspections to be made from time to time during construction but the responsibility for supervision and construction will rest with the Municipality or Local Council concerned.

Written reports of all inspections must be made to the District Engineer by the inspecting officer. These reports should include

Municipal Engineer

matters such as adequacy and suitability of the supervising staff employed, execution of work according to plans and specifications, the use of materials according to specifications, and general remarks. When inspections are made by the District Engineer personally a written record will be made.

If any report of an inspecting officer discloses any shortcomings in the work, the District Engineer must, even if he has already done so previously, immediately advise the District Commissioner ^{or his representative} with copy to D.P.W., of the defects giving the date of the inspection. No reports need be sent to the District Commissioner ^{or his representative} of the D.P.W. if the work is proceeding satisfactorily but they must be filed for record purposes. In this connection it should be clearly understood that the Department of Public Works has no responsibility for the actual execution or supervision of the work and that the inspections are only intended to assist the authority responsible for the construction and provide information as to any defects which have been observed during the inspection.

The frequency of the inspections must be governed by the magnitude of the work, and the inspecting staff available and is left to the discretion of the District Engineer, but even on the smallest works there should be a minimum of three inspections during construction,

(Of which one should be when foundations are being put in and another when the roof is being constructed)
(vii) The above instructions relate only to the construction of accommodation i.e. new buildings or additions to existing buildings and no inspections in connection with other works on schools such as repairs, improvements etc. need be undertaken by the Department of

Public Works. *Requests from District Inspectors of Education for inspections in connection with the safety of buildings should be complied with.*
(b) Village Schools.

183-3/8 Vol 1
The instructions contained in Director of Public Works' letter No. 3/8 of 2.5.1935, a copy of which is attached, remain unchanged and should be strictly adhered to in future. In view, however, of the above, these instructions will henceforth apply only to schools in villages having no local council. Inspecting officers should however make written reports to the District Engineer after each inspection, in a similar manner to those for buildings in Municipalities and Local Council areas, and any defects reported in the same manner.

A copy of the complete project will also be sent by the Director of Public Works to the District Engineer concerned and ~~the latter will supply the District Commissioner with a list of the Contractors to be invited to tender.~~

(iii) In the event of funds being required by the Director of Public Works to meet the cost of preparation of the project, the *D.E. Education* District Commissioner will ensure that such funds are placed at the disposal of the former.

(iv) Tenders for the execution of the work will be called for by the Municipality or the Local Council and the District Engineer will advise, on behalf of the D.P.W., as to the acceptance of tenders. In the event of the advice of the District Engineer not being accepted the responsibility will rest with the Municipality or Local Council concerned.

On behalf of the Municipality or Local Council
(v) The District Commissioner will ~~supply~~ the District Engineer with a copy of the contract and will advise him of the date the work is due to commence.

(vi) The District Engineer will arrange for inspections to be made from time to time during construction but the responsibility

for supervision and construction will rest with the Municipality or Local Council concerned.

Written reports of all inspections must be made to the District Engineer by the inspecting officer. These reports should ~~cover, amongst others,~~ ^{include} matters such as adequacy and suitability of the supervising staff employed, execution of work according to plans and specifications, the use of materials according to specifications, and general remarks.

If ~~the~~ ^{any} report of the inspecting officer discloses any shortcomings in the work, the District Engineer must, even if he has done so ~~in previous reports,~~ ^{previously} immediately advise the District Commissioner, with copy to D.P.W., of the faults giving the date of the inspection. No reports need be sent to the District Commissioner ~~and~~ ^{or} the D.P.W. ~~when~~ ^{if} the work is ~~satisfactory~~ ^{proceeding}. In this connection it should be clearly understood that the Department of Public Works has no responsibility for the execution or supervision of the work and that the inspections are only intended to provide the authority responsible for the construction with information as to any faults which ~~may occur in the execution of the work, and which~~ ^{have been observed during the inspection}.

The frequency of the inspections must be governed by the magnitude of the work, and the inspecting staff available and is left to the discretion of the District Engineer, but even on the smallest works there should be ~~no less than~~ ^{a minimum of} 3 inspections ^{during construction}.

(vii) The above instructions relate only to ~~a~~ ^{the} construction of accommodation i.e. new buildings or additions to existing buildings, ~~and but the Department of Public Works should undertake no inspections in connection with other works on schools such as repairs, improvements etc. need be undertaken by the Dep. of P. Works.~~

(b) Village Schools.

The instructions contained in Director of Public Works' letter No.3/8 of 2.5.1935, a copy of which is attached, remain unchanged and should be strictly adhered to in future. In view, however, of the above, these instructions will henceforth apply only to schools in villages having no local council. ~~Inspecting officers~~ ^{however} ~~should make written reports to the District Engineer after each inspection~~.

2nd draft

Subject :- Construction of school accommodation.

The following procedure will be ^{*adapted*} ~~followed~~ in future for the construction of school accommodation in (a) Municipal and Local Council areas (excluding Jerusalem, Haifa, Tel Aviv and Jaffa) and in (b) villages other than villages having local councils.

(a) Municipal or Local Council areas (excluding those of Jerusalem, Haifa, Tel Aviv and Jaffa.).

(i) Applications for the preparation of designs will be made by the Director of Education to the Director of Public Works.

(ii) The designs will be prepared at P.W.D. H.Qrs. unless in any special case specific instructions are issued by the Director of Public Works to the contrary.

The project which will comprise ~~complete~~ drawings and a short specification will be forwarded by the Director of Public Works to the Director of Education. A copy will also be sent by the Director of Public Works to the District Engineer concerned, and the latter will, if requested by ~~the~~ a District Commissioner ^{*acting*} on behalf of the Municipality, or Local Council, give advice regarding the contractors to be invited to tender for the work.

(iii) In the event of funds being required by the Director of Public Works to meet the cost of preparation of the project, the Director of Education will ensure that such funds are placed at the disposal of the former.

(iv) Tenders for the execution of the work will be ^{*invited*} ~~called~~ for by the Municipality or the Local Council and the District Engineer will advise, on behalf of the D.P.W., as to the acceptance of tenders. In the event of the advice of the District Engineer not being accepted ^{*no*} ~~the~~ responsibility will rest with the ^{*Public Works Dept.*} ~~Municipality or Local Council concerned.~~

(v) The District Commissioner on behalf of the Municipality or Local Council will furnish the District Engineer with a copy of the contract and will advise him of the date ^{*on which*} ~~the~~ work is due to commence.

was sent to them.

Not necessarily

yes that was intended

(c) Re (ii) of (1). If the District Engineer is to advise on the acceptance of tenders, he should also advise as to the names of the contractors to be invited to tender. I presume that tenders will be called for by the District Officer or the District Commissioner and in order to cover this point the "preparation of the design" mentioned under (i) of (1) should be defined to cover also all contract documents including a list of contractors to be invited to tender.

I don't think it is an instruction that Mr. B. should draw up contract documents but merely provide a standard specification as a guide?

(d) (ii) of (1) speaks of construction by contract. What will occur in the case of construction by direct labour?

(e) I presume that the instructions are intended to cover construction of accommodation only, namely: new buildings or additions to existing buildings, but no other works such as repairs, improvements etc. If my assumption is correct I think that this point should be mentioned in the instructions.

(f) Apparently there are to be separate instructions for school accommodation constructed in Municipal and Local Council areas and for construction of village schools. I understand however that many villages have Local Councils. Is it definitely the intention that the procedure re village schools should apply only to villages having no Local Council?

(g) The procedure with regard to the construction of village schools is outlined in folio 182, file 3/8, Vol. I. Is it intended that this procedure should be observed as at present defined? It differs fundamentally from the instructions envisaged in connection with school accommodation in Municipal or Local Council areas in 3 matters, i.e. the tenders are adjudicable by the F.W.D. District Tenders Board; the District Engineer certifies payments and the District Engineer deals with the local representative of the Department of Education and not with the District Administration.

10.11.1942.

D2.

S.R.W.

(4)

(3) Submitted for your instructions pl.

2. I have made marginal comments in pencil as I understand the position, with question marks on points which may be affected by what was discussed at the meeting you had with F.S. and A. & E.

(5) *WMA* *S* *Re see (5)*

A5(2)

The first thing to hammer home is that

There is one set of ~~rules~~ ^{procedure} for village schools and another for schools in Municipal and Local Council areas (other than the 4 cities mentioned in (1)). The village schools are to follow the procedure at fol 182 - it says so on page 3 of (1). As regards Municipal & Local Council areas (2) designs will be prepared at Hdqrs unless directions to the contrary are issued in any specific case (6) advice on "acceptance of tenders" means ^{any} advice in regard to invitation and acceptance of tenders - it will include provision of drawings & short specification but not the contract form as used in 11.18

P.S. The PC is Govt representative for Municipal & Local Council affairs. That is why reports will be made to them.

VISUAL REGISTRY 3 6 NOV. 1942 P.W.D. Jerusalem
--

Chief Secretary's Office.
Jerusalem.

5th November, 1942.

J.P.W.
on 12/2

Director of Education
Acting Director of Public Works.

I am directed to refer to the meeting held on the 22nd October, 1942, in this office, regarding the school accommodation programme, and to confirm the following decisions taken at that meeting:-

In the case of school accommodation constructed in Municipal or Local Council areas (excluding those of Jerusalem, Haifa, Tel Aviv and Jaffa) for which provision is made in whole or in part under item 25 of Head XIII of the Department of Education.

- (i) The Director of Public Works will accept responsibility for the preparation of designs;
- (ii) The Director of Public Works will advise on the acceptance of tenders by the Municipal or Local Council - and, in the event of his advice not being accepted, responsibility will rest with the Municipal or local council concerned.
- (iii) The Director of Public Works will inspect the work during construction from time to time, but the responsibility for supervision and construction will rest with the Municipal or Local council concerned.

2. I am to add that, in view of the existing overemployment and inflation no progress should be made on works not yet started in that programme for which provision has been made under item 25 of Head XIII in the approved estimates, without my prior approval.

3. I am also to confirm that the existing arrangements with regard to village works, including the construction of school accommodation in Arab villages, are to continue.

A 572) (2)
This will have to be circulated to D.P.W. and the village schools arrangements (para 3 of (i)) revised

2. The covering instruction should insist that written reports of all inspections - both under para 1 (iii) and village schools must be made to the District Engineer by the Inspecting officer on every occasion. They should cover points as follows (a) adequacy and suitability of the supervisory staff employed (b) that the work is being executed to plan & specifications Copy to: Accountant General Auditor (c) that the materials being used comply with the specifications (d) general remarks. If the report is

REPLIED f.183, 206

REFERRED TO 60-318 W/2

for CHIEF SECRETARY.

~~Master Inspector~~

indicates that there is anything wrong the D.E. must (even if he has done so on a previous report) report the matter to the District Commissioner of the District giving the date of inspection. A copy of all such reports should be sent to S.D.W. There is no need to write to D.E. if all is well with the job, but D.E. will be held responsible for reporting anything wrong which has been observed by the inspecting officer on his report. The frequency of the reports will depend on the magnitude of the work and the staff available but even on the smallest job i.e. village school should be not less than 3. D.E. should have it made clear to them that they have no responsibility for the supervision of the work as this will rest with the constructing authority. The D.E.'s functions are solely to make the inspections, see that their inspecting officers put in a written report under the heads I have quoted, report to D.E. if anything is wrong (with copy to S.D.W.). If the faults reported to D.E. are not corrected the D.E. nor the Dept. will be liable.

A copy of the instruction should go to CS ref (1) & to S.D. Education.

Let me see the draft, which perhaps I will draw up for you.

(3)

M
2/11

A.D. (2).

In compliance with your request, I have read (1) and (2) and also the 1935 instructions (folios 182 & 183 in file 3/8 Vol. I) with regard to the construction of village schools. I find that before I can draft instructions to D.E.E. in connection with (1) there are several important points which should be elucidated:-

(a) Re (i) of (1). It should be stated who will prepare designs, i.e. the District Engineer or the Senior Architect H.Qrs. If the District Engineer, must he refer designs to H.Qrs. for approval?

(b) From whom requests for preparation of designs should be accepted. In the 1935 instructions re village schools the District Commissioner does not come into the picture at all, whereas from minute (2) it appears that at present the Director of Education does not come into the picture as far as the P.W.D. is concerned.

It is surprising in view of (2) that in the Chief Secretary's letter District Commissioners are not mentioned and that no copy of the letter

CHIEF SECRETARY.

With D Educ & I were present in

Subject :- Supervision of School Buildings

Reference:- Your F/851/29/40 of 11.8.42.

I shall be obliged if directions may now be issued indicating the action to be taken in regard to the supervision of the construction of school buildings.

2. Until recently Government used to undertake at its own expense the construction of school buildings in towns. In villages school buildings were erected, at village expense helped by grants from this Department, by local contractors under such supervision as could be conveniently lent by District Engineers, who used to assist in drawing up the contracts.

3. Early this year, owing to the lack of imported materials it was decided that school buildings in the smaller towns should be erected by Local Authorities using only local materials according to traditional Oriental methods. Funds were transferred to Local Authorities from the Public Works Department for this purpose and Local Authorities undertook to carry out the building projects themselves and, if necessary, make up deficiencies in funds from local sources. It was understood by this Department that the supervision and advice hitherto

Q 14 83

From P.S.
D Educ
& Home
Local Auth.

NO 12
accorded by District Engineers in the case of village school buildings would be available, at least in some degree, in the case of small town buildings

4 Your letter F/851/29/40 of 2nd February 1942 however was held by the Director of Public Works to absolve his Department from any supervision whatever, either in towns or villages, vide his 3/8 of 19.6.42 to me. As a result you approved the appointment of an Engineer to this Department to supervise all school buildings. I now understand that this arrangement has been reconsidered and that further instructions will issue.

5. School building construction falls naturally under three heads, viz:-

- (i) Buildings in the three large towns, constructed with the use of imported materials, such as iron and concrete. *Partly constructed with about stone*
- (ii) Buildings of local construction in the smaller towns for large schools. *built of stone*
- (iii) Buildings of local construction in villages for smaller schools.

Buildings under (i) cannot be undertaken until the free import of materials is resumed.

Buildings under (ii) differ mainly from those under (iii) in that they will be bigger and of slightly better quality, and towns can usually employ the full or part-time services of a municipal engineer.

The latter however in most cases requires some experienced supervision especially in cases where the bulk of the funds are provided by Government.

They should be equal to (i)

3
I do not agree V.
Buildings under (iii) are in more urgent need of experienced supervision since villagers are more easily duped by dishonest contractors.

6. I recommend then that the Public Works Department be requested to continue their supervision as in the past for village schools and to make similar arrangements for the general supervision of town school buildings erected by Local Authorities and for advice to locally employed engineers. *This will be agreed at meeting with Mr. E. S. M.*

Nazareth District
Nablus District

166

Subject: Ma'aref Schools

Reference: Further to my No. 36/20
of 3.10.1942.

Government has now decided that Education (Ma'aref) properties should cease to be maintained by Government from the date of their being handed over to the Local Education Authority, and not from the date on which the transfer actually takes place in the Land Registry, the last eight words of my letter No. 36/20 of 12.9.1942 should therefore be considered as cancelled. 156

2. The Deputy or Assistant District Commissioners concerned in each case will arrange for the handing over to be made, but District Engineers will assist him in preparing handing over certificates recording the condition of the properties when handed over to the Local Education Authority.

3. In case any questions are raised in the future it is essential that the handing over certificates should be complete in all respects and therefore the size, number and condition of all buildings should be recorded, the kind, and condition of fences, kind and condition of paths, details of water supplies, sewerage and drainage

schemes, lighting and so on. Information should also be given regarding the manner in which these properties and their services have been operated and maintained should be given, who provided funds, under what votes and so forth.

1820/PA.

Department of Education,
Jerusalem.
16th October, 1942.

Director of Public Works,

Subject :- Public Works Extraordinary 1943-44.

Major works required by this Department under P.W. Extraordinary comprise one item only, the purchase of a site adjacent to the Government Arab College for extension of the existing site estimate at IP.2000.

A All other items of Major Works are in respect of additional classrooms of the vaulted roof type and provision for their construction by Local Education Authorities from local material will be included in my budget.

2. I shall be obliged if you will also include the sum of LP.1500 for minor new works required by this Department during the coming financial year. This sum is considered sufficient for minor new works required for school buildings present hiring occupied by this department and new hirings likely to be occupied next year.

3. Regarding provision for the maintenance of school buildings, as I believe you are aware approval has been given to the State Domain Committee's recommendations for certain State Domain buildings to be handed over to Local Education Authorities in trust for education and when this has been done the maintenance of these buildings will be the onus of the Local Education Authorities.

There are actually only a few buildings in process of being handed over and the formalities are likely to be so protracted that it is not considered advisable to make any reduction in the maintenance vote for next year at least.

In consequence I would suggest that provision continue to be made in your estimates for 1943-44 for the maintenance of all Government school buildings and hirings.

4. In view of the normal growth in towns it is expected that additional hirings will be required. Estimates for this item are in course of preparation and will be submitted.

P.W.D. H. Qrs. Jerusalem

I presume that a copy of the Chief Secretary's letter L/60/41 of 16th July 1942 and the report on the subject of the registration of Education (Ma'aref) properties was forwarded to you, since reference is made to it in the Chief Secretary's above quoted letter.

2. It has now been agreed by Government that the properties should cease to be maintained by Government from the date of their being handed over to the Local Education Authority and not when the transfer actually takes place in the Land Registry.

The Assistant District Commissioner in each case has been informed that he should arrange for the necessary handing over and I shall be obliged if your officers may be instructed to assist him in preparing a handing over certificate showing the condition of the properties when they are handed over. I think this is necessary as some question may arise in the future.

If you agree to this, it will be necessary for the Assistant District Officer

P.T.O.

What Officer in Government

concerned to inform your District Engineer when the handing over of any individual property is to take place.

Memorandum on Works Programme
Department of Education.

159-34157/1

On 4.12.1941 (F/851/29/40) C.S. decided to withhold authority to incur expenditure on following items of P.W. Extraordinary owing to shortage of controlled materials.

Item 18	Hebron	560
19	Qalgilya	250
20	Salahiya	275
21	Salahiya	1125
22	Lydda	1120
23	Safad	1680
24	Beersheba	1680
25	Beisan	1000
26	Jenin	1000
		<u>8690</u>

108

On 29.12.41 Director of Education in 1820/PE urged release of funds under item 18 and that funds under remaining items should be allotted to Local Education Authorities "who would arrange to carry out the work themselves without the use of imported building materials". They would build rooms with vaulted roofs, the construction of which "does not require steel or cement". The construction "will be undertaken in accordance with the specifications of the P.W.D. and under its strict supervision".

177-34157/1

On 2.2.42 in F/851/29/40 the Chief Secretary approved the allocation of funds under items 19 to 26 to Local Education Authorities "who would arrange to carry out the works themselves without the use of imported building materials. As regards supervision the Local Education Authorities would be required to assume full responsibility for the expenditure of the works but D.P.W. will be prepared to assist by supplying type drawings and specifications for a vaulted class room". D.P.W. to submit requisition to incur expenditure and issue F.A's to Director of Education.

181-34157/1

On 11.2.42 in 1820/PE Director of Education asked D.P.W. to obtain requisition for funds under items 19, 20, 21, 25 and 26 LP.3,650.

188 in 34157/1

On 26.2.42 Director of Education in 1820/PE asked D.P.W. to requisition for items 23, 24, 25 LP.4,480. It was pointed out to Director of Education by D.P.W. :

- (a) that the method of allocation proposed by Director of Education did not conform with C.S.'s and that Government advice should be sought as to procedure [This Director of Education did in 1820/PE of 20.2.42]
- (b) that it was unnecessary to requisition funds which could not be expended by 31.3.42.

187-34157/1

Note:- There appears to be an error in the item Nos. which should read 22, 23 and 24.

On 18.5.42 Director of Education issued letters of instruction to D.I.E. Southern reference items 22 and 24 with copy to D.P.W. These instructions included the following :-

- "(a)
- (b) The District Engineer or his representative will inspect the site when the foundations have been dug. The foundations should not be filled in except with his authority.

- (c) The District Engineer or his representative should be asked if he would kindly arrange to inspect the work at the following stages :-

- (1) when the walls have been built
(2) when the vaults have been completed
(3) On completion of the work.

- (d) Any advice offered by the District Engineer or his representative should be carried out".

On 21.5.42 in 3 D.P.W. pointed out to Director of Education that in approving that funds should be allotted to Local Education Committees the Chief Secretary had stated "Local Education Authorities would be required to assume full responsibility for the expenditure of the works but that D.P.W. would assist by supplying type drawings and specifications". The latter had been supplied. D.P.W. therefore stated that he was not prepared to undertake the inspections set out by Director of Education in his letters of 18.5.41 to D.I.E's.

In a D.O. letter 1820/PE of 29.5.42 the Deputy Director of Education to Acting D.P.W. reference was made to the procedure agreed upon in May 1935 whereby the P.W.D. agreed to undertake inspections as detailed in the instructions to D.I.E's. D.P.W. was also asked if he would consider doing the work as P.W.D. jobs. The procedure of May 1935 referred solely to village schools and in reporting to Chief Secretary the arrangements (3/8a of 2.5.35) the D.P.W. wrote :-

".....the only satisfactory method of supervision would be to employ a man for each school since they are normally situated too far apart for one man satisfactorily to supervise more than one building, obviously such a course cannot be pursued as cost would be out of all proportion to the value of the building

..... the best arrangement which I can make to assist the Education Department and to obviate waste of Government contribution

..... It should however be fully understood that from any point of view this arrangement is not entirely satisfactory since it will not allow my officers to keep in touch with construction during the whole period of the work, does not constitute and must not be construed as 'supervision' and I cannot therefore accept responsibility for the buildings being satisfactory on completion or even stable under certain conditions".

In W/66/35 of 8.8.35 the Chief Secretary approved the arrangements "regarding the construction of village schools".

In 3 of 2.6.42 D.P.W. in a D.O. letter replied to Deputy Director of Education and set out clearly his views on the execution of work and responsibility therefor - A copy of this letter was sent to Chief Secretary with D.P.W.'s letter No.3 of 6.8.42, which also advised consultation with the Competent Authority regarding the release of the controlled materials required, the position in regard to which had materially changed in the intervening 6 months (23.1.42 when minute 942 in C.S. file P/851/29/40 and 2.6.42).

On 11.8.42 in P/851/29/40 the Director of Education was authorised to engage an Engineer on a salary of LP.500 - LP.600 p.a. and was instructed to discuss the question of selection and salary with D.P.W. On 3.9.42 the Deputy

3. 141

Director of Education called on D.P.W. and discussed the matter, following on which D.P.W. reported to Chief Secretary in letter No.3 of 5.9.1942.

Memorandum on Works Programme
Department of Education.

On 4.12.1941 (F/851/29/40) C.S. decided to withhold authority to incur expenditure on following items of P.W. Extraordinary owing to shortage of controlled materials.

Item 18	Hebron	560
19	Qalqilya	250
20	Salahiya	275
21	Salahiya	1125
22	Lydda	1125
23	Safad	1680
24	Beersheba	1680
25	Beisan	1000
26	Jenin	1000
		<u>8690</u>

On 29.12.41 Director of Education in 1820/PE urged release of funds under item 18 and that funds under remaining items should be allotted to Local Education Authorities "who would arrange to carry out the work themselves without the use of imported building materials". They would build rooms with vaulted roofs, the construction of which "does not require steel or cement". The construction "will be undertaken in accordance with the specifications of the P.W.D. and under its strict supervision".

On 2.2.42 in F/851/29/40 the Chief Secretary approved the allocation of funds under items 19 to 26 to Local Education Authorities "who would arrange to carry out the works themselves without the use of imported building materials. As regards supervision the Local Education Authorities would be required to assume full responsibility for the expenditure of the works but D.P.W. will be prepared to assist by supplying type drawings and specifications for a vaulted class room". D.P.W. to submit requisition to incur expenditure and issue P.A's to Director of Education.

On 11.2.42 in 1820/PE Director of Education asked D.P.W. to obtain requisition for funds under items 19, 20, 21, 25 and 26 LP.3,680.

On 26.2.42 Director of Education in 1820/PE asked D.P.W. to requisition for items 23, 24, 25 LP.4,480. It was pointed out to Director of Education by D.P.W. :

- (a) that the method of allocation proposed by Director of Education did not conform with C.S.'s and that Government advice should be sought as to procedure (This Director of Education did in 1820/PE of 30.2.42)
- (b) that it was unnecessary to requisition funds which could not be expended by 31.3.42.

Note:- There appears to be an error in the item Nos. which should read 22, 23 and 24.

On 18.5.42 Director of Education issued letters of instruction to D.I.S. Southern reference items 22 and 24 with copy to D.P.W. These instructions included the following :-

- "(a)
- (b) The District Engineer or his representative will inspect the site when the foundations have been dug. The foundations should not be filled in except with his authority.

(c) The District Engineer or his representative should be asked if he would kindly arrange to inspect the work at the following stages :-

- (1) when the walls have been built
- (2) when the vaults have been completed
- (3) On completion of the work.

(d) Any advice offered by the District Engineer or his representative should be carried out".

On 21.5.42 in 3 D.P.W. pointed out to Director of Education that in approving that funds should be allotted to Local Education Committees the Chief Secretary had stated "Local Education Authorities would be required to assume full responsibility for the expenditure of the works but that D.P.W. would assist by supplying type drawings and specifications". The latter had been supplied. D.P.W. therefore stated that he was not prepared to undertake the inspections set out by Director of Education in his letters of 18.5.41 to D.I.E's.

In a D.O. letter 1820/P2 of 29.5.42 the Deputy Director of Education to Acting D.P.W. reference was made to the procedure agreed upon in May 1935 whereby the P.W.D. agreed to undertake inspections as detailed in the instructions to D.I.E's. D.P.W. was also asked if he would consider doing the work as P.W.D. jobs. The procedure of May 1935 referred solely to village schools and in reporting to Chief Secretary the arrangements (3/8a of 2.5.35) the D.P.W. wrote :-

".....the only satisfactory method of supervision would be to employ a man for each school since they are normally situated too far apart for one man satisfactorily to supervise more than one building, obviously such a course cannot be pursued as cost would be out of all proportion to the value of the building

..... the best arrangement which I can make to assist the Education Department and to obviate waste of Government contribution

..... It should however be fully understood that from any point of view this arrangement is not entirely satisfactory since it will not allow my officers to keep in touch with construction during the whole period of the work, does not constitute and must not be construed as 'supervision' and I cannot therefore accept responsibility for the buildings being satisfactory on completion or even stable under certain conditions".

In W/66/35 of 8.8.35 the Chief Secretary approved the arrangements "regarding the construction of village schools".

In 3 of 2.6.42 D.P.W. in a D.O. letter replied to ^{Deputy} Director of Education and set out clearly his views on the execution of work and responsibility therefor - A copy of this letter was sent to Chief Secretary with D.P.W.'s letter No.3 of 6.8.42, which also advised consultation with the Competent Authority regarding the release of the controlled materials required, the position in regard to which had materially changed in the intervening 6 months (23.1.42 when minute 242 in C.S. file F/851/29/40 and 2.6.42).

On 11.8.42 in F/851/29/40 the Director of Education was authorised to engage an Engineer on a salary of LP.500 - LP.600 p.a. and was instructed to discuss the question of selection and salary with D.P.W. On 3.9.42 the Deputy

October 6th, 1942

Subject : Construction of School Buildings.

Reference: Your Personal & Confidential
F/851/29/40 of 3.10.1942.

In view of the possibility of this whole question forming the subject of discussion at an early date I have prepared the attached memorandum in which I have set out in chronological order the sequence of events which have led to the present position. I refrain from any comment on the letter of the Director of Education No.1820/PE of 25.7.1942 to you.

2. In summing up the position I would say that the views of this Department are very clearly set out in minute (242) in your file and in my letter to you No.3 of 6.8.1942 and the D.O. letter to the Deputy Director of Education enclosed therewith.

3. Should you require any further information prior to the proposed meeting I shall be pleased to furnish it.

(Sgd.) V. KENNEDY
Actg. DIRECTOR OF PUBLIC WORKS.

P3.

Memorandum on Works Programme
Department of Education.

On 4.12.1941 (F/851/29/40) C.S. decided to withhold authority to incur expenditure on following items of P.W. Extraordinary owing to shortage of controlled materials.

Item 18	Hebron	560
19	Qalqilya	250
20	Salahiya	275
21	Salahiya	1125
22	Lydda	1120
23	Safad	1680
24	Beersheba	1680
25	Beisan	1000
26	Jenin	1000
		<u>8690</u>

On 29.12.41 Director of Education in 1820/PE urged release of funds under item 18 and that funds under remaining items should be allotted to Local Education Authorities "who would arrange to carry out the work themselves without the use of imported building materials". They would build rooms with vaulted roofs, the construction of which "does not require steel or cement". The construction "will be undertaken in accordance with the specifications of the P.W.D. and under its strict supervision".

On 2.2.42 in F/851/29/40 the Chief Secretary approved the allocation of funds under items 19 to 26 to Local Education Authorities "who would arrange to carry out the works themselves without the use of imported building materials. As regards supervision the Local Education Authorities would be required to assume full responsibility for the expenditure of the works but D.P.W. will be prepared to assist by supplying type drawings and specifications for a vaulted class room". D.P.W. to submit requisition to incur expenditure and issue F.A's to Director of Education.

On 11.2.42 in 1820/PE Director of Education asked D.P.W. to obtain requisition for funds under items 19, 20, 21, 25 and 26 LP.3,650.

On 26.2.42 Director of Education in 1820/PE asked D.P.W. to requisition for items 23, 24, 25 LP.4,480. It was pointed out to Director of Education by D.P.W. :

- (a) that the method of allocation proposed by Director of Education did not conform with C.R's and that Government advice should be sought as to procedure (This Director of Education did in 1820/PE of 20.2.42)
- (b) that it was unnecessary to requisition funds which could not be expended by 31.3.42.

Note:- There appears to be an error in the item Nos. which should read 22, 23 and 24.

On 18.5.42 Director of Education issued letters of instruction to D.I.E. Southern reference items 22 and 24 with copy to D.P.W. These instructions included the following :-

- "(a)
- (b) The District Engineer or his representative will inspect the site when the foundations have been dug. The foundations should not be filled in except with his authority.

(c) The District Engineer or his representative should be asked if he would kindly arrange to inspect the work at the following stages :-

- (1) when the walls have been built
- (2) when the vaults have been completed
- (3) On completion of the work.

(d) Any advice offered by the District Engineer or his representative should be carried out".

On 21.5.42 in 3 D.P.W. pointed out to Director of Education that in approving that funds should be allotted to Local Education Committees the Chief Secretary had stated "Local Education Authorities would be required to assume full responsibility for the expenditure of the works but that D.P.W. would assist by supplying type drawings and specifications". The latter had been supplied. D.P.W. therefore stated that he was not prepared to undertake the inspections set out by Director of Education in his letters of 18.5.41 to D.I.E's.

In a D.O. letter 1820/PS of 29.5.42 the Deputy Director of Education to Acting D.P.W. reference was made to the procedure agreed upon in May 1935 whereby the P.W.D. agreed to undertake inspections as detailed in the instructions to D.I.E's. D.P.W. was also asked if he would consider doing the work as P.W.D. jobs. The procedure of May 1935 referred solely to village schools and in reporting to Chief Secretary the arrangements (3/8a of 2.5.35) the D.P.W. wrote :-

".....the only satisfactory method of supervision would be to employ a man for each school since they are normally situated too far apart for one man satisfactorily to supervise more than one building, obviously such a course cannot be pursued as cost would be out of all proportion to the value of the building

..... the best arrangement which I can make to assist the Education Department and to obviate waste of Government contribution

..... It should however be fully understood that from any point of view this arrangement is not entirely satisfactory since it will not allow my officers to keep in touch with construction during the whole period of the work, does not constitute and must not be construed as 'supervision' and I can not therefore accept responsibility for the buildings being satisfactory on completion or even stable under certain conditions".

In W/66/35 of 8.8.35 the Chief Secretary approved the arrangements "regarding the construction of village schools".

In 3 of 2.6.42 D.P.W. in a D.O. letter replied to ^{Deputy} Director of Education and set out clearly his views on the execution of work and responsibility therefor - A copy of this letter was sent to Chief Secretary with D.P.W.'s letter No.3 of 6.8.42, which also advised consultation with the Competent Authority regarding the release of the controlled materials required, the position in regard to which had materially changed in the intervening 6 months (23.1.42 when minute 242 in C.S. file F/851/29/40 and 2.6.42).

On 11.8.42 in F/851/29/40 the Director of Education was authorised to engage an Engineer on a salary of LP.500 - LP.600 p.a. and was instructed to discuss the question of selection and salary with D.P.W. On 3.9.42 the Deputy

3.

Director of Education called on D.P.W. and discussed the matter, following on which D.P.W. reported to Chief Secretary in letter No.3 of 5.9.1942.

CHIEF SECRETARY.

Subject:- Construction of School Buildings.

Reference:- Your F/851/29/40 of 2nd February, 1942.

You will recall that in your letter under reference you approved the transfer of a sum from Public Works Department extraordinary to school building grants for Local Authorities.

2. The reason for this transfer was the economical provision of necessary school places in buildings which the Public Works Department were either unable to construct at all owing to shortage of staff or materials or unable to construct except at prohibitive cost.

3. In this respect the position remains the same. Unless the money is expended as grants to Local Education Authorities no new places will be provided.

4. In another respect the position has altered. The Acting Director of Public Works refuses to continue his advice to Local Education Authorities in the construction of school buildings and I understand this refusal to apply not only to town authorities but to villages also which according to an ancient agreement have hitherto always enjoyed the advantage of some supervision from Public Works. This agreement is now stated by the Acting Director of Public Works to be abrogated by your letter of 2nd February 1942. I do not understand your letter in the sense in which it is understood by Public Works Department.

5. This attitude of Public Works Department is not stated to be due to inadequacy of staff; that is a matter which was fully considered seven years ago when it was quite clearly agreed between myself and the then Director of Public Works that no more advice or supervision would be expected than the officers of the Public Works Department could find time to offer.

6. The ground now stated for refusal is that as a condition of assistance the Acting Director of Public Works demands complete control of the whole of the works, a control which admittedly he is unable to assume with speed, economy and efficiency in present circumstances.

This attitude raises a question of public policy which I prefer not to discuss in detail at this moment. I may however observe on two points. The first is that while I appreciate the Acting Director of Public Works' fear that responsibility may be attached to him for defects arising from neglect of his advice, there is no warrant for this timidity in the past relations between his predecessors and this Department. The second point is that I do not see for what reason the Department of Public Works should be placed in the singular position of refusing to work for Government except upon its own terms.

7. The alternatives seem to be

(a) to restore the money to Public Works Extraordinary and to expend it with all speed;

(b) to require all Local Education Authorities to employ reputable architects and clerks of works;

(c) to engage a full-time engineer as an officer of this Department.

8. The first solution has already been ruled out as impracticable in discussions with the Director of Public Works. On his side he has not the staff for full control nor the materials with which to build as he would like. On my side, I find Public Works Department at all times excessively expensive while at the present it is perhaps inadequately skilful in domed constructions, which alone are now possible.

9. The second solution increases the cost to Local Education Authorities. None but the largest towns employ permanent engineers and the villages have no need for permanent engineers. The cost of hiring full expert supervision of a small construction in a village would be prohibitive. I remain of opinion that the most economical course is that Public Works be directed to continue the arrangements detailed in his 3/8a of 2nd May 1935 with enclosure and approved in you W/66/35 of 8th August 1935.

10. The third solution would be the most satisfactory to this Department and I request that the post be immediately created and advertised in Grade H. It is possible that a suitable opening would thereby be created for the merited promotion of one of the undergraded Arab employees of the Public Works Department of which the senior grades have hitherto been too exclusively a British preserve.

11. If none of these solutions is adopted, the result will be that

either no additional accommodation will be built,

or the accommodation built will be less safe, and less well constructed than if supervised, however cursorily, by Public Works Department.

The first alternative result would be a disaster, the second an absurdity.

Subject : Government Schools.
Reference: Your No. 36/3/3 dated 1.9.42.

I understand that school buildings previously State Domain will now become the property of Local Education Authorities (i.e. the Municipality, Local Council or Mukhtars as the case may be) and administered by the Local Education Committee in each case. No rent will obviously be paid by the Local Authority but the latter will be entirely responsible for all maintenance and repairs.

Educational properties (endowments) other than schools such as shops and buildings which provide funds for the carrying on of educational work will also come into the ownership of local authorities and the latter will be able to demand rental from the occupants, whether Government or private persons. The local authorities of course are responsible for maintenance.

I suggest however that you ask Chief Secretary direct to elucidate any points on which you are doubtful after reading the report of the Committee.

JERUSALEM.

2859/3 14.

20th August, 1942.

Chairman,
Central Housing Committee,
Jerusalem.

Subject 4- Government schools.

Reference- Your letter No. 36/21/3/3
dated 14.8.42.

I enclose for your perusal a copy of the
report dated 19.6.42 of the State Domain Committee
regarding the disposal of He'arof properties. The
Committee's recommendations embodied in their
report have been approved by Chief Secretary in
his letter No. 1/60/41 dated 16.7.42 to Director
of Land Settlement.

(Sgd.)

for DIRECTOR OF EDUCATION.

The question submitted to the Committee is whether, and if so which, properties claimed to be educational (Ma'aruf) should be handed over to and registered in the name of local educational committees under section 13 of the Education Ordinance.

2. The question is complicated by the diverse nature of the properties and by the conditions of their occupation. In order not to confuse the issue, we have refrained from dealing for the time being with Mandarinas (lapsed) Waqf properties and have confined ourselves to the following bulk of Miki properties :-

- (a) School buildings erected or acquired by purchase and maintained by the Turkish Government; and
- (b) Schools and other premises built or acquired by the public by purchase or gift, and paid for and maintained from private contributions, special taxes and Government subvention.

3. The Ottoman provisional Primary School Law of 5th Rabi'ul 1331 A.H. (23rd September 1913) made the local educational committee responsible for raising the necessary funds for the provision and maintenance of schools and this law, though never receiving parliamentary approval (High Court Case No. 72/31 of 18.5.32), was acted upon until 1932, at least in parts of Palestine.

4. Section 13 of the Education Ordinance 1933 provides that land acquired by a local education authority shall be registered in the name of that authority. This section did not, however, provide for the similar registration of old educational properties, as the question of their category was, at the time, under discussion, the Supreme Moslem Council contending that they were Waqaf Mandarinas (W/38/31 of 23.6.31).

5. At the first meeting of our committee at which these questions were discussed, the Director of Education expressed the opinion that in principle the properties used for schools or which were or had been regarded as Ma'aruf, though not used for educational purposes, should be handed over and registered in the name of the local educational authority, but in view of the complexity of the individual cases we decided to prepare a list of such properties and to deal with each individually.

6. The attached list of properties, prepared by the Department of Land Settlement, was forwarded to the Director of Education who recommended that they should be handed over to the Local Education Authority concerned, adding that these authorities would undertake to maintain the buildings if and when registration in their names had been effected. This, the Director of Education maintained, would be in accordance with the general policy set out in the Education Ordinance (Cap. 50) and Rules particularly Rule 59 (P. 1710, Vol. III - Laws of Palestine).

7. The Committee supports this recommendation, which is in general accordance with Government's policy of fostering local autonomy, subject to the following observations.

8. Referring to the attached list in more detail, those properties registered in the name of the High Commissioner in trust for the Government of Palestine, mentioned in the attached List marked A/2, Serial Nos. 1 to 6 and 18, should be transferred at once to the Local Education Authorities concerned while Nos. 7 to 16 should be transferred on the expiration of the existing tenancies when vacant possession can be given. The property at Serial No. 17 should be retained in Government ownership since it forms an integral part of a State Domain building from which it cannot be separated.

9. The list marked B/2 contains the Turkish Ma'aruf properties that are still registered in the name of the Turkish Treasury or some local educational body. Serial Nos. 1 to 10 should be handed over forthwith to the local educational authorities.

concerned while Serial Nos. 7 and 8 should be handed over after the expiration of the existing tenancies on condition, in both cases, that the local authority concerned arranges for the registration in its name of each within one year, in order that Government may be reasonably certain that the property will not be disposed of at some future date for other than educational purposes.

10. The unregistered Turkish Ma'arif properties described in List C attached should also be handed over to the Local Education Authorities, provided registration is carried out within a year, with the exception of the property at Serial No. 6 in respect of which Government holds a perpetual leasehold interest and not ownership. The leasehold interest in this property should be handed over to the Local Education Authority provided the transfer is agreed to by all the parties.

11. The Committee further agrees in principle with the submission made by the Director of Education to the effect that all State Domain properties occupied by public schools should be registered in the name of the Local Education Authority concerned, provided that a list of such properties is submitted for scrutiny and approval. This would include such land as has been purchased by Government for the extension of existing schools, playgrounds, etc.

12. Government is at present maintaining most of the properties shown in the lists from funds provided under either Item 3 or 13 of Head XVI of the Estimates. This will no longer be necessary when the properties are handed over. The Director of Education confirms that, when so handed over, the Local Education Authorities will maintain them and that no additional grant will be required except where the authority concerned is definitely unable to meet its obligations when a special case will be submitted by the Director of Education.

13. Such properties as are being occupied by Government will have to pay rent on their being handed over to the Local Education Authority. This applies only in the case of Serial Nos. 4 and 10 in lists A/2 and B/2, respectively, for which the rent should not be heavy. In no case, however, should such rents as have been collected or are payable under existing agreements be paid over to the Local authorities as the management and maintenance of such properties have been and, until the agreements expire, will continue to be concern of Government.

(Sgd.) E. G. Harris.

149

REPORT ON EDUCATIONAL (MA'AREF) PROPERTIES.

1. The question submitted to the Committee is whether, and if so which, properties claimed to be educational (Ma'aref) should be handed over to and registered in the name of local educational committees under Section 13 of the Education Ordinance.

2. The question is complicated by the diverse nature of the properties and by the conditions of their occupation. In order not to confuse the issue, we have refrained from dealing for the time being with Mendarissa (lapsed) Waqf properties and have confined ourselves to the following bulk of Wafi properties:-

- (a) School buildings erected or acquired by purchase and maintained by the Turkish Government; and
- (b) Schools and other premises built or acquired by the public by purchase or gift, and paid for and maintained from private contributions, special taxes and Government subvention.

3. The Ottoman provisional Primary School Law of 5th 411 A.D. 1331 A.H. (23rd September 1913) made the local educational committee responsible for raising the necessary funds for the provision and maintenance of schools and this law, though never receiving parliamentary approval (High Court Case No. 71/31 of 13.5.32), was acted upon until 1932, at least in parts of Palestine.

4. Section 13 of the Education Ordinance 1933 provides that land acquired by a local education authority shall be registered in the name of that

authority. This section did not, however, provide for the similar registration of old educational properties, as the question of their category was, at the time, under discussion, the Supreme Moslem Council contending that they were *Awqaf Munkarissah* (S/33/31 of 23.6.31).

5. At the first meeting of our Committee at which these questions were discussed, the Director of Education expressed the opinion that in principle all properties used for schools or which were or had been regarded as *Mak'aruf*, though not used for educational purposes, should be handed over and registered in the name of the local educational authority, but in view of the complexity of the individual cases we decided to prepare a list of such properties and to deal with each individually.

6. The attached list of properties, prepared by the Department of Land Settlement, was forwarded to the Director of Education who recommended that they should be handed over to the Local Education Authority concerned, adding that these authorities would undertake to maintain the buildings if and when registration in their names had been effected. This, the Director of Education maintained, would be in accordance with the general policy set out in the Education Ordinance (Cap. 5) and Rules particularly Rule 59 (P. 1710, vol. III - Laws of Palestine).

7. The Committee supports this recommendation, which is in general accordance with Government's policy of fostering local autonomy, subject to the following observations.

8. Referring to the attached lists in more

detail, those properties registered in the name of the High Commissioner in trust for the Government of Palestine, mentioned in the attached List marked A/2, Serial Nos. 1 to 6 and 18, should be transferred at once to the Local Education Authorities concerned while Nos. 7 to 16 should be transferred on the expiration of the existing tenancies when vacant possession can be given. The property at Serial No. 17 should be retained in Government ownership since it forms an integral part of a State Domain building from which it cannot be separated.

9. The list marked B/2 contains the Turkish Ma'arif properties that are still registered in the name of the Turkish Treasury or some local educational body. Serial Nos. 1 to 6, 9 and 10 should be handed over forthwith to the Local Education Authorities concerned while Serial Nos. 7 and 8 should be handed over after the expiration of the existing tenancies on condition, in both cases, that the local authority concerned arranges for the registration in its name of each within one year, in order that Government may be reasonably certain that the property will not be disposed of at some future date for other than educational purposes.

10. The unregistered Turkish Ma'arif properties described in List C attached should also be handed over to the Local Education Authorities, provided registration is carried out within a year, with the exception of the property at Serial No. 6 in respect of which Government holds a perpetual leasehold interest and not ownership. The leasehold interest in this property should be handed over to the Local Education Authority provided the transfer is agreed to by all the parties.

11. The Committee further agrees in principle with the submission made by the Director of Education to the effect that all State Domain properties occupied

by public schools should be registered in the name of the Local Education Authority concerned, provided that a list of such properties is submitted for scrutiny and approval. This would include such land as has been purchased by Government for the extension of existing schools, playgrounds, etc.

12. Government is at present maintaining most of the properties shown in the lists from funds provided under either Item 3 or 13 of Head XVI of the Estimates. This will no longer be necessary when the properties are handed over. The Director of Education confirms that, when so handed over, the Local Education Authorities will maintain them and that no additional grant will be required except where the authority concerned is definitely unable to meet its obligations when a special case will be submitted by the Director of Education.

13. Such properties as are being occupied by Government will have to pay rent on their being handed over to the Local Education Authority. This applies only in the case of Serial Nos. 4 and 10 in lists A/2 and B/2, respectively, for which the rent should not be heavy. In no case, however, should such rents as have been collected or are payable under existing agreements be paid over to the Local authorities as the management and maintenance of such properties have been and, until the agreements expire, will continue to be concern of Government.

Chief Secretary.Subject : Construction of Schools.Reference: Your P/851/29/40 of 11.8.48 to Director of Education.

As I have not been furnished with a copy of Director of Education letter 1920/PS of 25.7.48 to which your letter under reference is a reply I am unaware of the reasons which led to the decision to appoint to the Department of Education an engineer at a salary within the scale of that of a grade 'H' officer, from which it appears that the previously approved principle whereby funds were to be allocated to Local Education Committees and those Committees were to undertake the work has been varied, and that the work will now be supervised by an officer of the Department of Education.

2. The Deputy Director of Education has discussed with me the question of the appointment of the officer referred to in para. 2 of your letter under reference. His proposal was that I should agree to the secondment from this Department of either Messrs. Bulos or Halaby, Executive Engineers grade 'H', to fill the vacancy. I was unable to accept this proposal in view of the heavy programme of work being undertaken by this Department and the shortage of staff for such works, and in particular shortage of Arab Engineers in the Department. Mr. Bulos has already approached me on the subject of his secondment having apparently been made aware of the vacancy by the Department of Education. Mr. Bulos is at present in receipt of a salary of LP.348 p.a. plus LP.48 cost of living i.e. LP.396 p.a. and naturally would like to improve his position by being appointed to a post carrying emoluments of LP.500 to LP.600 per annum. If an engineer is appointed at the salary scale suggested for the execution of a schools programme of about LP.20,000 in value, I anticipate considerable repercussions from the technical staff of this Department. It should be borne in mind that most District Engineers in the P.W.D. who are unfortunately graded in 'H', are responsible each month for an expenditure in excess of the whole school programme under discussion, whilst the Chief Architect of the Police Building Programme of a value of LP.2,200,000 is also only a grade 'H' officer.

3. Had this Department been informed that it could engage such additional supervisory staff as was considered necessary for the execution of the Education Department programme, the work could have been undertaken as normal Public Works, though as I have already pointed out the standard of work might have resulted in increased costs. I have informed the Deputy Director of Education that if the P.W.D. are authorised to engage three temporary foremen (one in each of the three districts where the work is to be done) and are given the necessary transport facilities the work can be undertaken by the P.W.D.

P.T.O.

4. I view with misgivings the creation within the Education Department of another "Works Department" and I am sure from this small beginning of one senior engineer a staff will grow and if the present salary basis is followed in other appointments discontent will result in the technical grades of the P.W.D. The assumption that the staff will increase is further strengthened by the information given me by the Deputy Director of Education that a scheme is being considered for the handing over to Local Education Committees of all school buildings including those now maintained by this Department. I do not appear to have been advised of this proposal.

As I have not been furnished with a copy of Director of Education letter 1820/PS of 25.7.42 to which your letter under reference is a reply I am unaware of the reasons which led to the decision to appoint to the Department of Education an engineer at a salary within the scale of that of a grade 'H' officer, from which it appears that the previously approved principle whereby funds were to be allocated to Local Education Committees and those Committees were to undertake the work has been varied, and that the work will now be supervised by an officer of the Department of Education.

2. The Deputy Director of Education has discussed with me the question of the appointment of the officer referred to in para.2 of your letter under reference. His proposal was that I should agree to the secondment from this Department of either Messrs. Bulos or Halsby, Executive Engineers grade 'K', to fill the vacancy. I was unable to accept this proposal in view of the heavy programme of work being undertaken by this Department and the shortage of staff for such work, and in particular shortage of Arab Engineers in the Department. Mr. Bulos has already approached me on the subject of his secondment having apparently been made aware of the vacancy by the Department of Education. Mr. Bulos is at present in receipt of a salary of LP.348 p.a. plus LP.46 cost of living i.e. LP.396 p.a. and naturally would like to improve his position by being appointed to a post carrying emoluments of LP.500 to LP.600 per annum. If an engineer is appointed at the salary scale suggested for the execution of a schools programme of about LP.20,000 in value, I anticipate considerable repercussions from the technical staff of this Department. It should be borne in mind that most District Engineers in the P.W.D. who are unfortunately graded in 'H', are responsible each month for an expenditure in excess of the whole school programme under discussion, whilst the Chief Architect of the Police Building Programme of a value of LP.2,200,000 is also only a grade 'H' officer.

3. Had this Department been informed that it could engage such additional supervisory staff as was considered necessary for the execution of the Education Department programme, the work could have been undertaken as normal Public Works, though as I have already pointed out the standard of work might have resulted in increased costs. I have informed the Deputy Director of Education that if the P.W.D. are authorised to engage three temporary foremen (one in each of the three districts where the work is to be done) and are given the necessary transport facilities the work can be undertaken by the P.W.D.

P.T.O.

4. I view with misgivings the creation within the Education Department of another "Works Department" and I am sure from this small beginning of one senior engineer a staff will grow and if the present salary basis is followed in other appointments discontent will result in the technical grades of the P.E.D. The assumption that the staff will increase is further strengthened by the information given me by the Deputy Director of Education that a scheme is being considered for the handing over to Local Education Committees of all school buildings including those now maintained by this Department. I do not appear to have been advised of this proposal.

Construction of Schools

G F / 851 / 29 / 40 of 11.8.42

I have not seen letter No 1820/PE
of 25.7.42 from the Director
of Education to which reference
has been made in your
F / 851 / 29 / 40 of 11.8.42 but
had I been aware that
Govt. contemplated appointing
an engineer on a salary
scale of £500 to £600 per
annum or was prepared to
~~provide~~
~~for~~ funds of that order
for the necessary supervisory
staff

2. ~~Then~~ As I have pointed
out in ^{para 19} my letter No 39 of 6.8.42
the ~~various~~ ^{heads} ~~the~~ projects
contemplated are items under
the Public Works Enlistment

and as such would
normally be executed by
the P.W.D. and provided I
am given authority to
engage the necessary
supervisory staff I am
prepared as in the case of
any other Extraordinary ~~acts~~
items to execute the work.

3. The Director of Education
^{however} suggested that the funds be
paid over to Local Education
Committees ~~and that they~~
~~execute the work~~
and that they should
execute the work under the
strict supervision of the P.W.D.
I was unable to agree to
that proposal in toto, but
if Government is prepared
to allow me to engage the
necessary supervisory
staff on the scale indicated
in your letter under
reference then I ~~shall~~

consider the work should
be undertaken by this
Dept. in the normal way
and I agree with the view
expressed in ^{minutes} (239) of F/85/29/40

That if the Local Committees
can do the work so can
the P.W.D.

4. With regard to the
salary scale for ^{the} one
~~of the~~
Engineers proposed I would
point out that the senior
Company officers in
this Dept. such as the
Assistant Chief Architect
of the Police Building Programme
of £2 million, ~~is~~ ^{is} ~~carried~~ and
the Probation Clerks of Works
are in receipt of salaries of
~~up to~~ the same amount
viz £600 p. a.
I would therefore

~~that~~ that
now
recommend that I
be authorised to engage
supervisory staff up to
a maximum of £600
pa. and undertake
the works in the normal
manner; ~~the~~

Ag. B. M.

Mr D.P.W.
10.8.42
August, 1942.

DIRECTOR OF EDUCATION.

I am directed to refer to your letter No. 1820/PK of the 25th July, 1942, with regard to the construction of school buildings for which provision is made under item 23 of your departmental vote, and to inform you that, after careful consideration, it has been decided to adopt the alternative suggested in paragraph 7(c) of your letter under reference in principle, subject, however, to the condition that the engineer proposed shall, in the first instance, be engaged on a temporary basis on a six months' contract (at a consolidated salary of from SP. 500 to SP. 600 per annum) with a view to carrying out, pending approval of the estimates by the Secretary of State, construction of the buildings for which approved provision in 1941/42 was transferred to your vote in 1942/43. If and when the estimates are approved the engineer will superintend the additional programme proposed for 1942/43. The contract with the engineer should provide for its termination at one month's notice from either party.

2. I am to request you to discuss the question of selection of the candidate and the salary to be offered with the Director of Public Works. Provision for his salary should be made by special warrant under a new item of your estimates quoting savings against item 23.

(Sgd.) R. W. Price

for DIRECTOR OF PUBLIC WORKS.

33.

REMINDED

135

RECEIVED

1911

August 6, 1942.

Chief Secretary.Subject:- Construction of Schools.Reference:- Your F/851/29/40 of 31-7-1942.

This is not correct. Provision in 1941/42 was P.W.D. but in 1942/43 transferred to Educ. Dept.

126
15/8

155-3415711

108

The financial provision for the works under discussion has been made under the head Public Works Extraordinary. In reply to your F/851/29/40 of 4-12-1941 the Director of Education in his 182/PE of 29-12-1941 put forward the proposal that the funds should be allocated to the Local Education Authorities who would arrange to build the class rooms using local materials. Certain controlled materials would inevitably be required but as pointed out in minute (242) the quantities would be relatively small and the Director of Public Works, who at that date was a Competent Authority, stated there would be no objection to the release of what was required.

109a

2. The position in regard to stocks of controlled materials has not improved since that date, and it would be well to obtain an assurance from the Controller of Heavy Industries, who is now the Competent Authority, that releases will still be possible - I have in mind principally timber for joinery and furniture.

177-
3415711

3. As regards the assistance to be provided by this Department, my advice was tendered in minute (242) of your file F/851/29/40 and your letter of same reference to Director of Education and dated 2-2-1942 accepted that advice and informed the Director of Education of the extent of the responsibilities to be borne by the Local Education Authorities and this Department. I find myself in some difficulty therefore in replying to your

letter F/851/29/40 of 31-7-1942 in which I am asked to state what assistance I can give the Director of Education in expediting the construction of these schools.

4. There are only two lines of action, viz:

- (a) the work is executed by the Public Works Department as in the case of any other Extraordinary Works item.
- or
- (b) the work is undertaken as recommended by the Director of Education by the Local Education Committee to type drawings and specifications supplied by the Public Works Department.

5. I attach for your information a copy of my D.O. letter of 2-6-1942 to the Deputy Director of Education which sets out my views on the matter.

6. Your file W/66/35 is returned herewith. The proposals set out therein were never considered satisfactory by this Department and were adopted with misgivings on all sides. I am not prepared to extend it to other buildings.

(Sgd.) V. KENNIFF

Dear Hogben

123
2nd June, 1942.

Subject : Additional accommodation
at Schools.

Reference: Your 1820/PE of 29.5.42.

The position as I see it is that Local Education Committee is either capable of undertaking the erection of the school buildings or it is not. If it is capable there can be no objection to it undertaking the work. If it is not capable it should not be entrusted with the work. It is quite obvious that if someone is to "inspect and advise" that person must be armed with sufficient authority to ensure that his advice and/or orders are executed, and he must accept full responsibility for the soundness of his advice and the proper execution of his orders.

2. There can be only one clear cut division of responsibility in a building job and that has been adopted in this case viz. the drawings and specification are furnished by one party and the execution of the project is undertaken by another. There cannot be two constructing authorities any more than there can be two designing authorities. If the Local Education Committees feel they require some technical assistance in the execution of these projects they should engage a competent person as their employee or servant to assist them to the extent they require assistance.

3. If the District Engineers undertook the erection of the buildings additional supervising staff would, under present conditions of work, have to be engaged and as I have already pointed out to the Chief Secretary a higher standard of work than that which would be acceptable to the Local Committee would be insisted upon and the cost would in consequence be higher.

4. Under these circumstances I feel that there is nothing further that this Department can do in assisting in these projects. We have had experience of lending "the helping hand" and "keeping an eye on the job" - the results have been unfortunate.

Yours sincerely

S.J. Hogben Esq.,
Department of
Education.

D.P.W.

Much as I would like to help the D of E, which I think we should do within our powers, I do not consider that under existing conditions the Dept is in a position to render assistance under a "gentlemen's agreement." The Dbls are more than fully occupied, and will be for some time to come and therefore even if it was agreed that P.W.D. staff should inspect the work the inspectors would in fact be observed by their branch rather than their absence.

2. If the Dept undertook to do the work it would be necessary to engage extra staff for the purpose, and furthermore a higher standard of work would be demanded than if the L.E.C did the work, this would mean additional ^{extra} expense, this point is dealt with in (242)_h in 10 of A File No 3.

3. Previous cases of giving "assistance" have been unsatisfactory, the Samaria Road, the Rand Buildings in Jericho and Hebron, and i. I can only suggest that the Dept is either "all in" or "all out." In the cases of these schools I suggest further that it be "all out."

1/16

P.S. Could we suggest the D of E appoint temporarily an Architect (ex P.B.P.) who would go round as his representative to see that the L.E.C carry out the works in a satisfactory manner? By Architect I mean any good man eg Clerk of Works or Architect etc.

Subject :- Additional Accommodation at Schools.Reference:- Your letter No.3 dated 21st May, 1942.

Dear Kenniff,

I am very anxious to reach some agreement in this matter if possible. My main concern is to get school buildings erected ready for occupation next September, but it is also important that they should be reasonably well constructed and that Government should get value for the money spent.

I fully appreciate your unwillingness to share responsibility for a job of work but we have not the least desire for you to do more than give advice and provide some measure of inspection without undertaking any actual responsibility for the work.

Inspection by your representative in no way relieves the Local Authority and its staff of responsibility for the building.

possibly not, but it does involve this Dept.

P.T.O.

As you know, in the past, advice and supervision have been given by the District Engineer or his representative in accordance with the procedure outlined in the attachment to your letter to the Chief Secretary No.3/8a of 2nd May 1935. This arrangement was never entirely satisfactory to you since the supervision could be no more than intermittent and you could not, therefore, guarantee the quality and safety of the structure. None the less the results have been generally satisfactory and the advice and supervision of the District Engineer acted as a valuable check on less experienced locally engaged engineering staff and the expenditure of public money.

I can assure you that we shall be most grateful for any assistance in getting the job done reasonably well and I promise that we shall not turn round on you at any time and say that it was your fault that some building later shows some flaw. I have no doubt that apart from the question of responsibility you have also to consider the amount of time which your district staff can give to work of this kind. I suppose that an occasional inspection will be far lighter on your staff than having to do the whole job from A to Z as was originally planned when the buildings appeared in the Public Works Extraordinary List for 1941-42. The work was transferred to Local Authorities in view of the lack of imported building materials so that the buildings could be erected according to local practice.

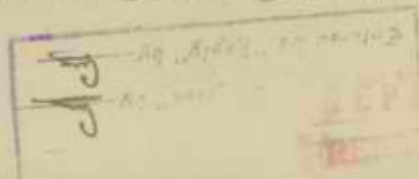

I suppose you would not consider taking on these buildings as a Public Works job and putting them up with vaulted roofs and so on without the use of cement and iron; and could the buildings be completed by September? However, as I said before, the main thing is to get the buildings and get as good ones as is possible.

Yours sincerely,

H. J. Mayhem

10 in 3/1/3

No.1820/PE of 15.5.42 to D.I.E. Haifa re Beisan Boys School.

177 in 34/5/1/1

In reply to your letter No.1820/PE of 29.12.41 the Chief Secretary, in his letter No.F/851/29/40 of 2.2.42 stated that funds for the erection of additional classrooms should be allocated to Local Education Authorities who would arrange to carry out the work themselves without the use of imported building materials. In para.2 of his letter the Chief Secretary adds that the Local Education Authorities would be required to assume full responsibility for the expenditure of the works, but that the Director of Public Works would assist by supplying type drawings and specifications. You have been provided with type drawings and specifications.

2. When I was asked by the Chief Secretary to comment upon the proposals made in your letter No. 1820/PE of 29.12.41 I stated inter alia

166 A in 34/5/1/1

"For the Local Education Committees to control the expenditure, and for the P.W.D. to supervise the works is dual control, which is unsatisfactory from every point of view and therefore I am unable to agree to the proposal."

I advised that either the Local Education Committees

P.T.O.

should assume full responsibility for expenditure and works, or that this Department should do so, and recommended the former course which recommendation Government accepted.

3. In the circumstances this Department is not called upon to inspect the site, examine the works, offer advice on construction or certify that the work has been satisfactorily completed and therefore I cannot agree to District Engineers undertaking any of the duties you ask of them in your letters to the D.I.E.s, as the Local Education Committees are to assume full responsibility for works and expenditure.

reply to C. S. in (242) of p 175.

It is clear, I think, from para 3 of (242) that this Dept is not required to supervise or examine the mark during its progress, and that the L. E. C. is responsible for the mark, this is agreed to by C. S. in para 2 of p 177.

4. Paras 4 (b) (c) and 5 (3) of ① are based on the procedure detailed in p 129 of 3/8/1 and this no longer applies as your predecessors did not agree to it, also p 177 in 34/57/1 does not call for any inspection marks by this Dept.

5. Design has already protested, see his 3/3 of 10/5/42 herewith.

6. Shall I inform D of E that D's cannot carry out the marks he allocates to them in ①?

Chief Secretary's Office,
Jerusalem.

25th March, 1942.

Director of Education.

I am directed to refer to the correspondence ending with your letter No. 1820/PE of the 5th March, 1942, concerning the reserved provision for the construction of school accommodation under Public Works Extraordinary in the approved estimates for 1941-42 (items 19 to 26).

2. As you have already been informed it has been decided to revoke the funds under items 19 to 26 of Public Works Extraordinary to your vote for grants to local education authorities for school sites and school buildings in the 1942-43 draft estimates. I am accordingly to authorise you to issue Financial Allocations as from 1st April, 1943, under this item for payment to Local Education Authorities concerned.

1. The construction of vaulted roofs over verandahs as suggested by Director of Education does not involve the use of controlled materials whereas roofing in Marseille tiles implies the use of timber and binding wire which are controlled and very scarce.

2. A vaulted roof to the verandah means making the columns heavier to take the weight and thrust of the barrel vault, but in the long run would I believe be cheaper and a better job.

3. May this be done please?

The Chief Secretary has been requested to release funds.

2. I regret I am unable to agree to your proposal to erect the verandah in masonry with a vaulted roof, as a Marseille tile roof supported on posts or columns should prove entirely satisfactory. If at a future date after the end of the war, it is required to erect another storey the walls and roof will be to normal construction in order to avoid the great weight of two vaulted roofs on the foundations. The corridor round the first storey would then be a concrete slab, either supported on columns at the edge of the verandah, and the walls of the main building, or cantilevered out from the first floor.

3. The drawings are being redesigned to incorporate heavier corners.

4. After funds are released a sum will be required by me to defray the cost of preparing the revised drawings.

111

For your information and guidance I forward herewith a copy of letter No.1820/PE of 4.2.1942 from the Director of Education to me.

2. The proposal to make the verandah in masonry with vaulted roofing is not agreed to, as if at some future date a storey is added the corridor may be provided by a reinforced concrete slab resting on the walls of the main building and on columns at the edge of the verandah. The verandah should therefore be designed with a Marseilles tile roof supported by columns or posts.

3. The storey which may be added in future probably after the end of the war, will be erected with thin walls and a reinforced concrete flat roof.

4. With regard to para.5 of the Director of Education's letter the thickness of the corners should not be less than one quarter of the span of the vault along the springing line.

5. Will you please proceed with the redesign of the classrooms on the lines indicated above, your drawings are Nos.3110, 3179, 3180 and 3267.

(Sgd.) H. C. H. JONES

With reference to Chief Secretary's letter No. F/851/29/40 dated 2nd February 1942 approving my recommendation that provision under items 19 to 26 Head XXXII should be allocated to the Local Education Authorities to enable them to carry out the works, I shall be obliged if a requisition may be submitted as soon as possible to incur expenditure on the items shown hereunder, and the necessary arrangements made to issue the financial allocations to this Department. The items on which agreement has been reached with the Local Education Authorities concerned are:

Item		Amount
19	Improvement to Boys' School, Qalqilia	LP. 250
20	Improvement to Boys' School, Salahiya	LP. 270
21	Additions to Salahiya Boys' School, Nablus	LP. 1125
25	Additions to Boys' School, Beisan	LP. 1000
26	Additions to Boys' School, Jenin	LP. 1000

2. With regard to items 22, 23 and 24, inquiries are being made to find out whether the Local Education Authorities concerned are agreeable to the proposal and desire to undertake the construction of the classrooms. I will address you further on this matter when their replies have been received.

3. With regard to the type drawings and specifications required for items 21, 25 and 26, I would point out that the enclosed drawings prepared by your Department are being adopted in village schools with modifications necessitated by local conditions. The size of each classroom in these drawings is 7 x 7 ms, which dimensions are in accordance with the modified requirements of this Department for such buildings. The covered verandah in these drawings consists of wooden beams with Marseilles tiles. Bearing in mind that another storey may be added in the future on top of the proposed classrooms, it is suggested that the verandah should be of masonry with a vaulted roofing. This will make it possible to use the top of the verandah as a passage for the rooms which may possibly be constructed on the first floor.

4. I would add that in almost every locality where these plans have been adopted, fear was expressed that the walls and the corners were not sufficiently thick. In fact, local masons have declined to be responsible for the stability of buildings constructed with the dimensions of the corners as shown in the plans.

P.T.O.

5. I shall therefore be obliged if in preparing the plans for the proposed classrooms, the question of a covered verandah with a vaulted roofing together with possible alterations in the thickness of the corners may be kept in mind if it is found that the doubts expressed by the local masons rest on technically valid grounds.

CK. *MD*

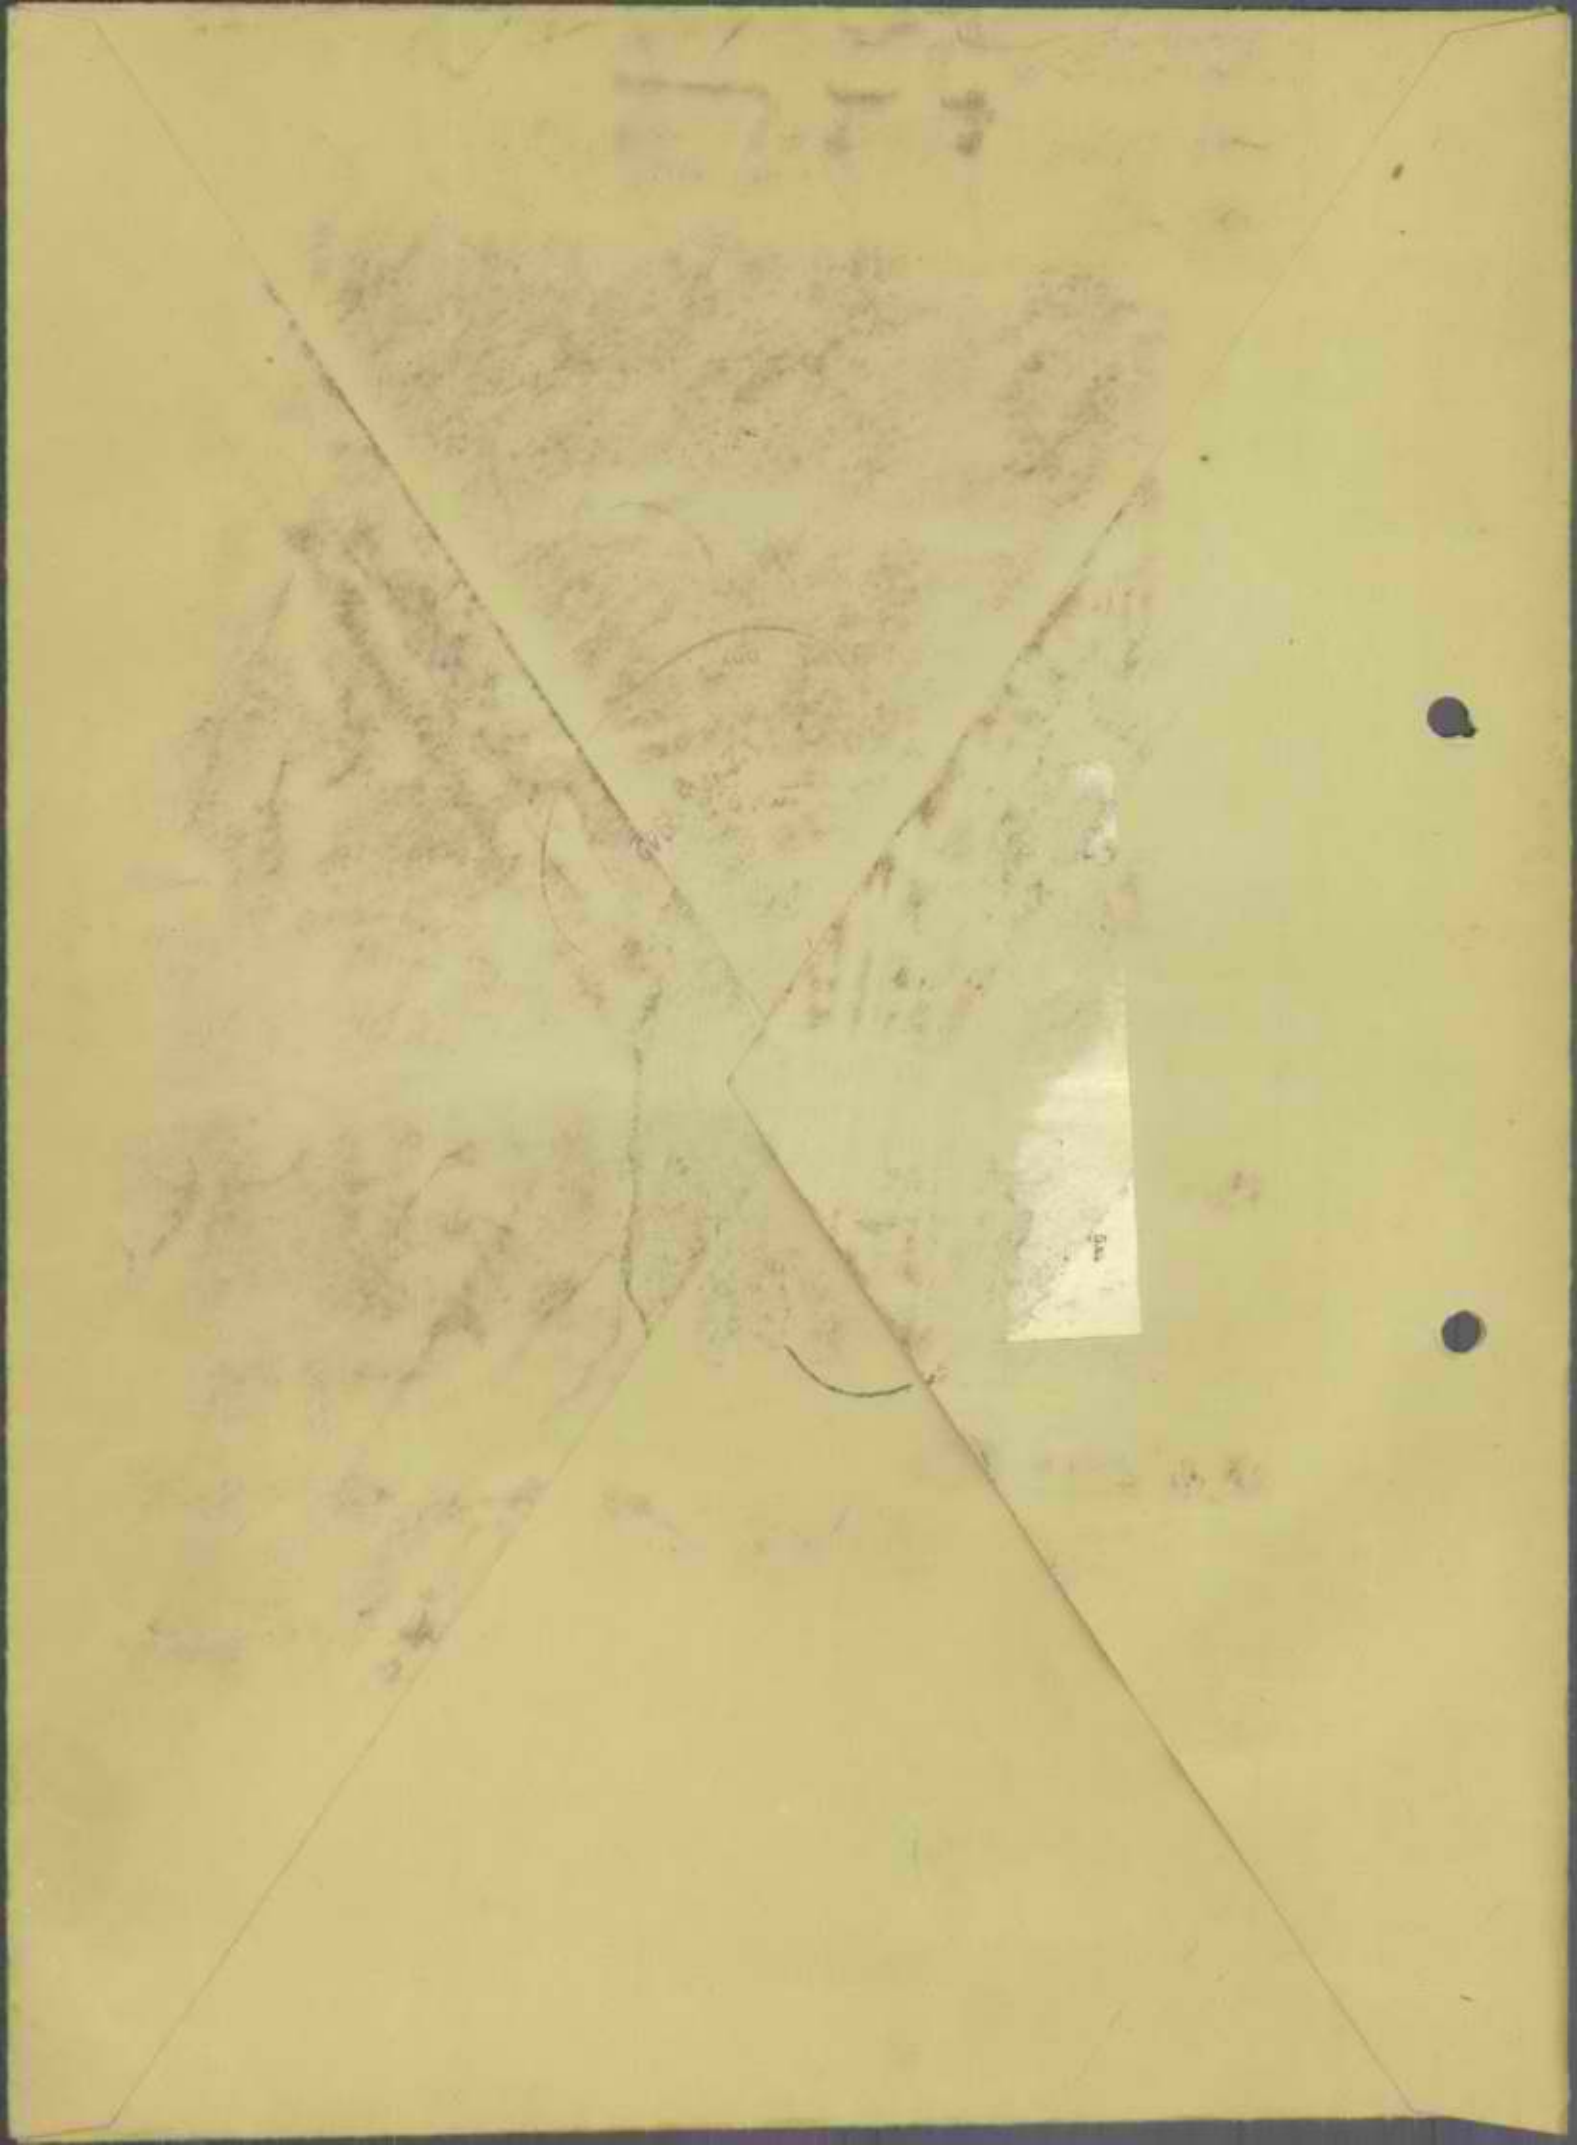

It is to be noted that the roof of the building is to be a vaulted roof. The weight of the roof will be a consideration. The roof will be built with a vaulted roof. The roof will be built with a vaulted roof. The roof will be built with a vaulted roof.

MD 2/2

SPECIFICATION

For Construction of Vaulted Roofs, (to be read in connection with drawing No. JM/3267). 3179

- Walls. 1. Before constructing shuttering for vault, external walls at corners and pilasters shall be built up to springing line and intermediate parts to a height slightly lower than the vault bearing.
- Centering. 2. Centering shall be constructed as follows. Put up posts about 12x24 cm. in centre and one post about 10x20 cm. at each corner of the room. Place additional studs about 10x15 cm. 70 cm. apart along the diagonals between centre and corner posts. Brace posts and support them firmly at lower ends. Lay logs of wood over posts, both diagonally and parallel to walls. Tie transversely with short pieces of timber. Support ends of logs over external walls. General surface formed by wood scantlings shall roughly follow shape of vault indicated on drawing. Cover timber with branches of trees or bushes, boards, old iron sheets etc. Place over this a 10 cm. layer of wet mud and shape the surface with trowel exactly to the required shape of vault intrados. Centering shall be strong and rigid, well able to support the superimposed load without settling.
- Roof vault. 3. Vault shall be built in strict accordance with drawing, of nari stones of good quality. Mortar shall consist of one part of lime to 1 part of approved crushed or wadi sand. Ashes may be substituted for sand or used jointly with it. Lay properly wedge-shaped stones dressed back the full thickness of vault from the springing line, proceeding gradually from all sides towards the centre to avoid unequal thrusts. Thickness of stones in ribs at springing line to be about 60 cms. and at crown 35 cms. Thickness to change gradually. Cover stones well with mortar before setting and provide good overlap and bonding, especially at arrises. When the crown has been reached a key stone made to fit properly shall be tightly driven into opening. If cracks or other defects appear on surface of vault after the removal of the shuttering they shall be repaired and or, if so ordered, the vault shall be rebuilt.
- Rib backing 4. Before striking centering build up over corners of vault in solid masonry up to a height of 4 ft. above floor level.
- Striking Centering. 5. Centering shall remain in position, on completion of the building of the vault, for at least two weeks if the work is done in summer. In winter this period shall be increased to three or four weeks depending on weather conditions.
- Filling 6. Filling over vault and depositing of roofing material shall be applied in even layers spread over the whole area and not in large heaps at a few spots.

● ● On His Majesty's Service

Extract from C.S. File No.F/851/29/40.

Subject : Estimates 1941 - 1942 Public Works Extraordinary.

(226) Director of Education - 29.12.1941.

(239) F.S.

Please see (194) and (226). The whole of the provision referred to therein has been revoted in the draft estimates for 1942-43 where it is described as 'avoidable revotes', i.e. revotes of expenditure included in the approved 1941-42 estimates which so far as it can be seen at present will not be commenced prior to 31st March, 1942.

2. With regard to the proposal to allocate these funds (LP.8,690) to local Education Authorities for constructing buildings without the aid of imported materials, I think the D.P.W's reaction should be obtained. If Local Committees can do this I don't see why P.W.D. cannot. On the other hand, I see no vital objection to payment of these grants to Local Education Authorities. If this is agreed to, however, the subsidiary question of transferring such expenditure to Head XIII Education or Head XV; both of which carry appropriate items will have to be considered.

3. I suggest immediate approval of item (18) and then as at X above.

Intld. V.N.L.
12.1.42

Intld. A.W.L.S.
13.1.

(240) I should like D.P.W's comments on (226) first please. You will realise that the only reason for withholding authority in these cases is shortage of materials and that even in respect of Hebron - item 18 - it is no use giving the authority asked for unless the materials required can be made available.

Intld. G.R.S.
14.1.42

(241) D.P.W.

Your comments on (226) and (239) and (240) would be appreciated.

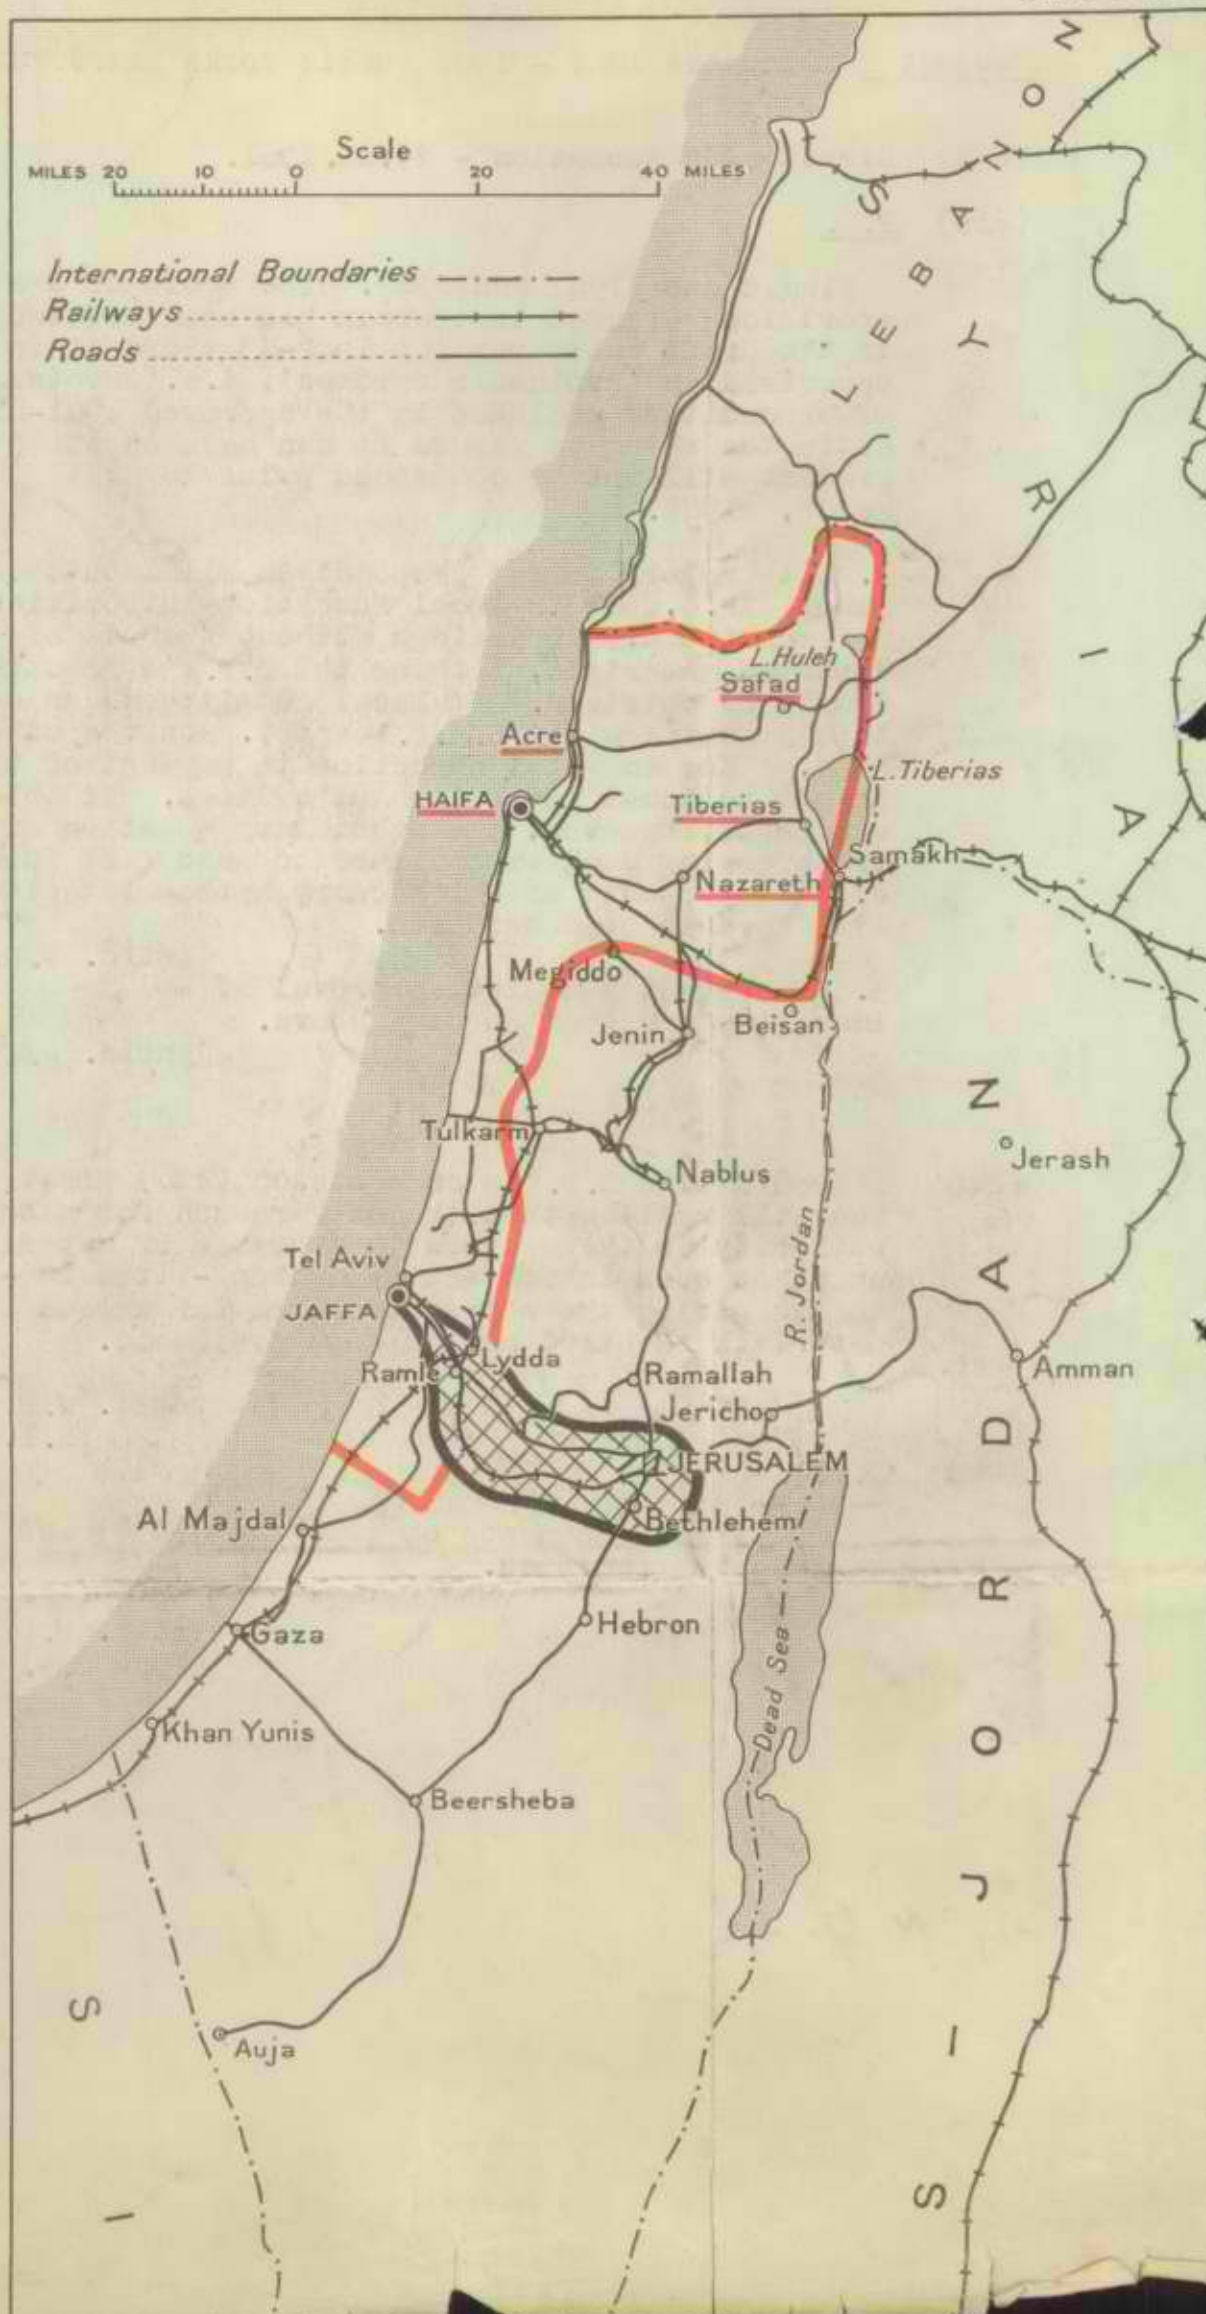

Intld. V.N.L.
for C.S. 14.1.42

REPLIED

Copy to 3.

MAP OF THE ROYAL COMMISSION'S PARTITION PLAN (REPRODUCED FROM THEIR REPORT) MAP No. 3

(242) Chief Secretary.

The quantities of 'controlled materials' required for the erection of a vaulted roof classroom would be small and I would have no objection to authorising the release of what is required.

2. The Director of Education proposes that the funds available should be allotted to the Local Education Committee who would then undertake the erection of the buildings "in accordance with the specifications of the Public Works Department and under its strict supervision". For the Local Education Committees to control the expenditure and for the P.W.D. to supervise the works is dual control, which is unsatisfactory from every point of view and therefore I am unable to agree to the proposal.

3. The classrooms may be erected by :

- (a) the Local Education Committees who would assume full responsibility for expenditure and works. To assist them I am prepared to supply type drawings and specifications for a vaulted roof class room.
- (b) the Public Works Department which would assume full responsibility for expenditure and works.

4. I favour course (a) of the preceding paragraph because the Local Education Committees under the spur of working for their own benefit, in their own area and under local criticism, will as a matter of pride if nothing else ensure that satisfactory buildings will be erected. Furthermore the standard of construction which would be acceptable to the Local Education Committee would almost certainly be lower than that which would be acceptable to this Department. You will realise I could not agree to lower the standard of construction for works carried out by this Department as if Departmental officers were permitted to adopt one standard here and another there, there would be openings for slackness, evasion of responsibility and possibly dishonesty. For this reason therefore the buildings erected by the Local Education Committees to meet their own requirements should cost less than if they were built by this Department to the usual departmental standards.

(Sgd.) H.C.H. Jones.

REPLIED 126
ENTERED 168

29th December, 1941.

108

CHIEF SECRETARY.

155 in 34/57/1

Subject : P.W.Extraordinary.Reference: Your letter No.F/851/29/40 dated 4.12.41.

The most urgent work for which funds should immediately be released is item 18, Improvements to Elementary Boys' School, Hebron. The funds which amount to L.F.560 are intended for the construction of an additional classroom. Three walls of the required classroom already exist. What is required is the fourth wall and a roof together with the woodwork.

2. In urging the release of the funds under item 18, I have to point out that the class for which the proposed room is intended is now accommodated in what used to be the store room of the school. This room is so unsuitable and congested that the construction of the classroom becomes a matter of extreme urgency.

3. With regard to the remaining items I would recommend for your consideration that the funds under these items should be allotted to the Local Education Authorities concerned who would arrange to carry out the works themselves without the use of imported building materials. In making this recommendation I have in mind that the main reason for withholding the expenditure on these items is the lack of imported building materials. If my recommendation is approved, the Local Education Committees will arrange to build the proposed classrooms with vaulted roofs. As you are aware the construction of vaulted rooms does not require steel or cement.

4. Some Local Education Committees have been approached on this matter and they all agreed that if the money is allotted to them, they will undertake to construct the classrooms without the use of steel and cement. The construction of the classroom will be undertaken in accordance with the specifications of the Public Works Department and under its strict supervision.

5. Further details governing the allocation of the funds to the Local Education Committees will be prepared in consultation with the Director of Public Works after the principle is approved.

DIRECTOR OF PUBLIC WORKS

1. Introduction

The purpose of this study is to investigate the effects of the proposed changes on the system. The study is divided into three main parts: a literature review, a description of the system, and an analysis of the proposed changes. The literature review will provide a background on the current state of the system and the proposed changes. The description of the system will provide a detailed overview of the system's components and their interactions. The analysis of the proposed changes will evaluate the potential benefits and risks of the changes.

2. Literature Review

The literature review will provide a background on the current state of the system and the proposed changes. It will identify the key issues and challenges associated with the system and the proposed changes. The review will also identify the research that has been conducted in this area and highlight the gaps in the current knowledge.

3. System Description

The system description will provide a detailed overview of the system's components and their interactions. It will describe the system's architecture, its data flow, and its user interface. The description will also include a discussion of the system's performance and its reliability.

Subject :- Expenditure on Government Schools.

Reference : Your No. 3 of 21.2.41

I shall be obliged if you will inform me of the amounts spent on Government schools in respect of:-

- (a) recurrent expenditure, during the financial year 1.4.40 - 31.3.41,
- (b) non-recurrent expenditure, during the period 1.2.41 - 31.3.41.

The latter item should be itemised in order to distinguish sums spent on Urban Schools under the original Loan Scheme from other Major Works.

5. Water Supply.

- (a) The water supply and connections shall comply with paras. 1, 2, 3 and 4 of the Model Bye-Laws of the Central Town Planning Commission.
- (b) The purity of water supplied for drinking shall meet with the approval of the Department of Health Drinking water shall be chlorinated should this procedure be required by the Department of Health.
- (c) Hygienic drinking water spouts of modern design are recommended wherever possible in the proportion of not less than 3 spouts for each 100 children.
- (d) Storage of drinking water in class rooms is forbidden.

6. General.

(a) All walls and ceilings shall be kept free from dust. All floors and desks shall be scrubbed once a week with soap and water. Walls and ceilings shall be whitewashed at least once each year and woodwork including desks repainted or varnished at least once every three years. Whitewashing, painting or varnishing shall be carried out at any time within these periods if considered necessary by the Medical Officer.

(b) Class rooms shall be frequently ventilated during the day by the opening of all windows and doors to their fullest extent.

(c) No class room or corridor shall be used as sleeping quarters.

(d) Covered fly-proof receptacles for rubbish shall be provided.

(e) Kitchens and dining rooms for scholars and staff shall be fly-proof in construction.

(f) Registers containing names and addresses of all scholars and teachers and attendance registers shall be open to Medical Officers of the Department of Health at all times.

(g) The occurrence of infectious disease amongst scholars or staff must be notified by the Head Teacher to the Department of Health at once. No person who is suffering from or has recently suffered from infectious disease shall be permitted to attend school without permission of the Department of Health. Contacts of infectious cases shall be excluded from school as directed by the Medical Officer of the Department of Health.

Sanitation and Hygiene of School Buildings and Training Colleges

1. All plans of new buildings and modification or reconstruction of existing buildings shall be submitted to the Department of Health for approval before building is commenced.

2. Site.

(a) The site shall be approved by the Department of Health.

(b) The site for a new building must be of such dimensions as to provide adequate open space around the building for free circulation of air and efficient lighting of class rooms by natural means.

(c) A play ground adjoining the school is necessary and in general a separate play ground for infants.

The following are the minimum play ground measurements subject to the shape of the area being satisfactory, and the exclusion of alley ways, forecourts, passages etc. from calculations of total space available.

A. For more than 200 children.

(1) For each elder child. 3.00 sq.m.

(2) For each infant. 1.50 sq.m.

B. For less than 200 but more than 30 children.

(1) 186 sq.m. + 2.00 sq.m. for each elder child.

(2) 186 sq.m. + 0.50 sq.m. for each infant.

C. For less than 30 children.

(1) 85 sq.m., if suitable in shape, for elder children.

(2) 60 sq.m., if suitable in shape, for infants.

3. Building.

(a) The orientation of the building should receive special consideration to provide the best lighting and ventilation by natural means. Where the direct rays of the sun may enter a room during class hours, awnings or some other movable apparatus which will not interfere with natural ventilation must be provided.

(b) The building shall be built of masonry, concrete, cement and burnt bricks, hollow concrete blocks, or silicate brick suitably damp proofed externally.

Internal walls shall be of masonry concrete, cement, silicate or burnt brick, or hollow gypsum blocks, asbestos sheets or other material for which approval is obtained.

Construction of lighter materials or of wood is not approved except where the population is not stationary or where the community is of a temporary nature.

(c) The roof shall be designed to prevent undue penetration of heat into class rooms and corridors.

All inside walls and ceilings shall present a clean smooth surface. Floors shall be of impervious material e. g. tiles, stone slabs or cement and shall be at least 5 cm. above the level of the adjoining ground.

(d) Height of rooms from floor to ceiling shall not be less than 4 metres. Every class room shall have cross ventilation by means of windows and ventilators, and lighting such that natural light penetrates to all parts of the room, the predominant light from the left side of the pupils.

Window space shall in area exceed $\frac{1}{6}$ and wherever possible equal $\frac{1}{4}$ of the floor space. The height of window sills from floor shall be 1.20 m. except in kindergarten class rooms. Unless the top of the windows be higher than 3.75 m. above the floor the breadth of a class room from the window wall should not exceed 7.50 m. Ventilating windows and ventilators shall be of a type approved by the Department of Health.

(e) Class rooms should usually be oblong in shape, a suitable size for a class of 40 children being 7-8 m. long by 6-7 m. wide—the longer wall being normally the window wall.

The wall facing the pupils should not contain doors, windows or fanlights.

(f) The following minimum floor space shall be provided in class rooms for each pupil.

For infants & elementary pupils.	0.8—1.10 sq. m.
For primary and secondary.	1.20—1.50 sq. m.
Laboratories.	2.25 sq. m.

The maximum number of pupils permitted in accordance with this scale shall be painted upon the door of each classroom.

(g) Staircases shall be at least 1.5 m. wide and of fireproof material. Each step should not be higher than 15 cms. and should be about 33 cm. broad. Emergency exits shall be provided from upper stories.

(h) The provision of cloak rooms adequately ventilated is recommended in all town schools.

4. Sanitation.

(a) Water closets within the main school building are undesirable except for staff. Other types of latrines are not permitted within the building. Separate latrines with separate approaches are required for boys and girls.

The following is the minimum scale upon which closets shall be provided:

	For Girls.	For Boys.	For Infants.	For girls & infants.
Under 30 children.	2	1	2	3
60 children.	3	2	3	3
70 children.	4	2	3	4
100 children.	5	3	4	5
150 children.	6	3	5	6
200 children.	8	4	6	7
300 children.	12	5	8	8

For boys there shall be in addition urinals in the proportion of three metres for each 100 boys divided into separate stalls not less than 40 cms. each internal dimensions. For schools over 300 pupils additional closets shall be provided in the proportion of 4 per 100 girls, infants or girls and infants, and 1 per 100 boys.

(b) Drainage and Sanitation shall be in accordance with Section VII of the Model Bye-Laws of the Central Town Planning Commission and the Plumbing Regulations of the Health Authority issued under para. 3 of the Rules made by the Central Town Planning Commission.

(c) Squatting type of closets shall be laid level with the floor which shall slope towards the pan on all sides.

Pedestal closets shall be of the wash down type provided with a rim-flush to the pan. Each closet shall be provided with a $2\frac{1}{2}$ gallon flushing cistern connected to the basin with a lead or iron pipe 3.8 cm. in diameter.

In the case of water closets of the squatting type similar flushing arrangements shall be provided.

(d) Wash hand basins shall be provided for scholars and staff.

5. Water Supply.

- (a) The water supply and connections shall comply with paras. 1, 2, 3 and 4 of the Model Bye-Laws of the Central Town Planning Commission.
- (b) The purity of water supplied for drinking shall meet with the approval of the Department of Health Drinking water shall be chlorinated should this procedure be required by the Department of Health.
- (c) Hygienic drinking water spouts of modern design are recommended wherever possible in the proportion of not less than 3 spouts for each 100 children.
- (d) Storage of drinking water in class rooms is forbidden.

6. General.

- (a) All walls and ceilings shall be kept free from dust. All floors and desks shall be scrubbed once a week with soap and water. Walls and ceilings shall be whitewashed at least once each year and woodwork including desks repainted or varnished at least once every three years. Whitewashing, painting or varnishing shall be carried out at any time within these periods if considered necessary by the Medical Officer.

- (b) Class rooms shall be frequently ventilated during the day by the opening of all windows and doors to their fullest extent.

- (c) No class room or corridor shall be used as sleeping quarters.

- (d) Covered fly-proof receptacles for rubbish shall be provided.

- (e) Kitchens and dining rooms for scholars and staff shall be fly-proof in construction.

- (f) Registers containing names and addresses of all scholars and teachers and attendance registers shall be open to Medical Officers of the Department of Health at all times.

- (g) The occurrence of infectious disease amongst scholars or staff must be notified by the Head Teacher to the Department of Health at once. No person who is suffering from or has recently suffered from infectious disease shall be permitted to attend school without permission of the Department of Health. Contacts of infectious cases shall be excluded from school as directed by the Medical Officer of the Department of Health.

Sanitation and Hygiene of School Buildings and Training Colleges

1. All plans of new buildings and modification or reconstruction of existing buildings shall be submitted to the Department of Health for approval before building is commenced.

2. Site.

- (a) The site shall be approved by the Department of Health.

- (b) The site for a new building must be of such dimensions as to provide adequate open space around the building for free circulation of air and efficient lighting of class rooms by natural means.

- (c) A play ground adjoining the school is necessary and in general a separate play ground for infants.

The following are the minimum play ground measurements subject to the shape of the area being satisfactory, and the exclusion of alley ways, forecourts, passages etc. from calculations of total space available.

A. For more than 200 children.

- (1) For each elder child. 3.00 sq.m.
- (2) For each infant. 1.50 sq.m.

B. For less than 200 but more than 30 children.

- (1) 186 sq.m. + 2.00 sq.m. for each elder child.
- (2) 186 sq.m. + 0.50 sq.m. for each infant.

C. For less than 30 children.

- (1) 85 sq.m., if suitable in shape, for elder children.
- (2) 60 sq.m., if suitable in shape, for infants.

3. Building.

- (a) The orientation of the building should receive special consideration to provide the best lighting and ventilation by natural means. Where the direct rays of the sun may enter a room during class hours, awnings or some other movable apparatus which will not interfere with natural ventilation must be provided.

(b) The building shall be built of masonry, concrete, cement and burnt bricks, hollow concrete blocks, or silicate brick suitably damp proofed externally.

Internal walls shall be of masonry concrete, cement, silicate or burnt brick, or hollow gypsum blocks, asbestos sheets or other material for which approval is obtained.

Construction of lighter materials or of wood is not approved except where the population is not stationary or where the community is of a temporary nature.

(c) The roof shall be designed to prevent undue penetration of heat into class rooms and corridors.

All inside walls and ceilings shall present a clean smooth surface. Floors shall be of impervious material e. g. tiles, stone slabs or cement and shall be at least 5 cm. above the level of the adjoining ground.

(d) Height of rooms from floor to ceiling shall not be less than 4 metres. Every class room shall have cross ventilation by means of windows and ventilators, and lighting such that natural light penetrates to all parts of the room, the predominant light from the left side of the pupils.

Window space shall in area exceed 1/6 and wherever possible equal 1/4 of the floor space. The height of window sills from floor shall be 1.20 m. except in kindergarten class rooms. Unless the top of the windows be higher than 3.75 m. above the floor the breadth of a class room from the window wall should not exceed 7.50 m. Ventilating windows and ventilators shall be of a type approved by the Department of Health.

(e) Class rooms should usually be oblong in shape, a suitable size for a class of 40 children being 7-8 m. long by 6-7 m. wide—the longer wall being normally the window wall.

The wall facing the pupils should not contain doors, windows or fanlights.

(f) The following minimum floor space shall be provided in class rooms for each pupil.

For infants & elementary pupils.	0.8—1.10 sq. m.
For primary and secondary.	1.20—1.50 sq.m.
Laboratories.	2.25 sq.m.

The maximum number of pupils permitted in accordance with this scale shall be painted upon the door of each classroom.

(g) Staircases shall be at least 1.5 m. wide and of fireproof material. Each step should not be higher than 15 cms. and should be about 33 cm. broad. Emergency exits shall be provided from upper stories.

(h) The provision of cloak rooms adequately ventilated is recommended in all town schools.

4. Sanitation.

(a) Water closets within the main school building are undesirable except for staff. Other types of latrines are not permitted within the building. Separate latrines with separate approaches are required for boys and girls.

The following is the minimum scale upon which closets shall be provided:

	For Girls.	For Boys.	For Infants.	For girls & infants.
Under 30 children.	2	1	2	3
60 children.	3	2	3	3
70 children.	4	2	3	4
100 children.	5	3	4	5
150 children.	6	3	5	6
200 children.	8	4	6	7
300 children.	12	5	8	8

For boys there shall be in addition urinals in the proportion of three metres for each 100 boys divided into separate stalls not less than 40 cms. each internal dimensions.

For schools over 300 pupils additional closets shall be provided in the proportion of 4 per 100 girls, infants or girls and infants, and 1 per 100 boys.

(b) Drainage and Sanitation shall be in accordance with Section VII of the Model Bye-Laws of the Central Town Planning Commission and the Plumbing Regulations of the Health Authority issued under para. 3 of the Rules made by the Central Town Planning Commission.

(c) Squatting type of closets shall be laid level with the floor which shall slope towards the pan on all sides.

Pedestal closets shall be of the wash down type provided with a rim-flush to the pan. Each closet shall be provided with a 2 1/2 gallon flushing cistern connected to the basin with a lead or iron pipe 3.8 cm. in diameter.

In the case of water closets of the squatting type similar flushing arrangements shall be provided.

(d) Wash hand basins shall be provided for scholars and staff.

Subject : School Buildings Estimates.

Reference: Your 3251/1/PE of 12.4.1940.

The approximate estimates which have been furnished have been based on data of prices for buildings previously constructed by this Department for the Department of Education.

2. As you have stated the estimates have been given at very short notice. The accommodation required has been supplied to this Department verbally by the Deputy Director of Education. Very little information is available as to the areas in which the buildings are to be built and no actual sites have been selected. A final or even closer estimates cannot therefore be given at this stage. If and when the scheme matures and more accurate information is available points such as those you raise in your letter under reply can be discussed and revised estimates prepared.

3. For the present purposes and on the information available I regret I am unable to give any closer estimates.

A.D.I.

M
School Buildings
Estimates

D. of E.'s letter dated 12.4.40

The estimates given were based generally on Government Arab College Building Jerusalem, (plus extra for war costs, and for stonework).

Except for small village schools Government Arab College is typical of the standard of work supplied to date for schools, and I presumed that this standard was expected by the D. of E.

The query raised is one for decision by D.P.W. and D. of E. as to what type of construction is considered adequate for the buildings referred to.

With the exception of the house for Headmaster these buildings are not small.

The higher cost of schools already built is not caused by the standard of construction only, which must always be strong enough for the purpose, and in Palestine this means to withstand probable earthquake shock, but by the difference in cost between the general standard of workmanship, finishes and fittings, of Government Buildings, and those of private buildings.

Obviously if the buildings are to be similar to the average house in a village or small town (incidentally is Nablus a "smaller" town of Palestine?), with its standard of workmanship, and all fittings cut down to the minimum cost, the cost of the buildings will certainly be less, but the maintenance cost will be greater, and the finished buildings will not be satisfactory as the buildings constructed to date, either constructionally, aesthetically, or from the point of view of general convenience.

The standard of existing school buildings in Palestine erected not only by Government, but by other bodies also, is, I think, higher than that of the average village or smaller town private building.

DEPARTMENT OF EDUCATION,
JERUSALEM.

Director of Public Works.

12 April, 1940

73

Subject :- School Buildings, Estimates.

Reference:- Your 3 of 21st March 1940.

I am obliged to you for the trouble you have taken in supplying at short notice the estimates enclosed with your letter under reference.

2. With regard to the latter items, namely.

Boarding hostels for villagers,
Women's Rural Teachers' Training Centre
Men's Rural Teachers' Training Centre
House for married Moslem Headmaster

am I to assume that these approximate estimates of cost are based on the type of construction which you would recommend in the smaller towns or villages?

If not, I should be obliged if you would let me know what the cost of these buildings would be if the type of construction employed were of the cheapest which you could recommend as being suitable for such towns as Nablus, Acre or Gaza.

Durability beyond 20 or 30 years need not, as far as this Department is concerned, be insisted upon as by that time possibly newly designed buildings may be desirable in any case.

Women's Training
College.

My letter dated 21st March, 1940.
Conversation. Mr. Hogben - Mr. Hume
on 9th April, 1940.

This is to confirm that Mr. Hogben requested the
estimated cost for the following items:

- a. Gate House
- b. Enclosure Wall.
- c. Playing Fields.

Mr. Hume replied that the prices included in the
very approximate estimated cost for these items were these:

- a. Gate House LP.240.
- b. Enclosure Wall LP.2,360.
- c. Playing Fields
including tennis
courts and net
ball courts LP.1,220.

Mr. Hogben requested the cost of the main Building
only if built of concrete construction, similar to Government
Arab College, and without heating installation.

Mr. Hume replied that on a basis of the information
supplied, on which the estimates already sent were made, the
very approximate cost would be LP.45,000

It may be very undesirable to erect a concrete
building on the site which is selected for the Women's
Training College, and the estimate given in my letter dated
21st March, was for a stone building, to allow for this
eventuality.

Stone Building.

Very approx. estimated cost LP. 1,800.000 each house

Based on the following list of accommodation
supplied by Deputy Director of Education and
sizes approved by Deputy Director of Education.

Item	Room	No. of Rooms	Size of Rooms
1	Reception Room	1	4.50 x 4.50
2	Bed Rooms	2	each 4.50 x 4.50
3	Central Hall and Dining Room	1	4.00 x 6.00
4	Kitchen, etc.	1	3.00 x 5.00
5	Lavatory, etc.		

The price of LP. 1,800.000 does not include
the cost of land or furniture, and is for a
Building of simple construction.

CHAPTER I

Very few new buildings have been erected since the last session of the Legislature. The only new building erected since the last session of the Legislature is the new building of the State House, which was erected by the State House Commission. The cost of this building was \$1,000,000. The building is now completed and is ready for occupancy.

Item	Room	No. of Rooms	Price of Room
1	Reception Room	1	\$500 x 1.50
2	Ball Room	1	\$500 x 1.50
3	Central Hall and Dining Room	1	\$500 x 1.50
4	Kitchen, etc.	1	\$500 x 1.50
5	Lavatory, etc.	1	\$500 x 1.50

The price of the building is \$1,000,000.

The cost of the building is \$1,000,000.

Building of simple construction.

30 PupilsStone Building

Very approximate estimated cost LP. 10,500.000

based on the following list of accommodation supplied
by Deputy Director of Education and sizes approved by
Deputy Director of Education.

Item	Room	No. of Rooms	Size of Rooms
1	Dormitories		6 m2 per pupil
2	Class Rooms	2	each 7.00 x 7.50
3	Resident Master	1	3.80 x 3.80 + 3.80 x 2.20
4	Dining Hall	1	5.00 x 7.50
5	Living Room	1	7.00 x 7.50
6	Kitchen etc.	1	4.00 x 6.20
7	Box Room and Stores	1	3.40 x 6.00
8	Servants Room	1	3.00 x 4.00
9	Servants Dining Room	1	3.00 x 4.00
10	Office accommodation	1	4.00 x 4.00
11	Lavatories, Showers, W.C.s, etc.		

The price of LP. 10,500.000 does not include
the cost of land or furniture.

I should be obliged if you could give me details of the Extraordinary Expenditure in 1938-39, item by item, in order that I may be able to calculate what part of the total sum of £P.25,427.948 is to be treated as "loan expenditure" (see Treasurer's letter 401/30/39 of 15th June, 1939).

62

92 - 3/12

I should also be obliged if you could let me have your most recent Estimates, item by item, of Extraordinary and Loan expenditure on schools, both for the current year 1939-40, and for next year 1940-41.

JERUSALEM.

Recd 18/10
A.D. (2)
17
13th

13th October, 1939.

Director of Medical Services.

Subject :- Form O.M. 309. Regulations for Sanitation and Hygiene of School Buildings.

Reference:- Your 87/1 of 18th August, 1939.

I now return the proof of the above regulations.

2. Various points arising out of these rules were discussed at a meeting held on 7th October 1939 in the Headquarters offices of the Public Works Department and it was then decided that before any recommendations for amendment were considered reference should be made to the latest publications issued by the Board of Education in England.

3. I now enclose for your perusal a library copy of pamphlet No.107 issued by the Board of Education dated 1937, which I shall be glad if you will return in due course.

4. It is realised of course that conditions in England differ considerably from those in Palestine and that regulations applicable to the former may not be entirely suitable for the latter.

5. The main points which require consideration are

- (a) the minimum window space to be provided with direct access to the outside air;
- (b) the minimum floor space per pupil;
- (c) the minimum height of rooms which are less than, say, 30 sq. metres in area;
- (d) the suggested size and shape of classrooms;
- (e) the types of building material which may be used in certain localities.

6. Reference should be made in the first regulation to the amendments made in May 1938 to rules 3 and 5 under the Education Ordinance in which it is laid down that plans of school premises must also be submitted to the Director of Education if demanded by him. For this purpose it is suggested that the following words be added to regulation 1 :-

"and such plans as may be demanded by the Director of Education shall also be submitted to him."

Copy to:- Director of Public Works.

October 15, 1959. 66

Chief Secretary.

Subject : Repairs and Reconditioning of
Buildings, after occupation by the
Military.

Reference: Your 2/44/59 of 30.2.1959.

83 in
3/3/6 No 2

I agree with the Director of Education that in cases where repairs of buildings must be undertaken to the source from which funds are to be made available for the purpose.

2. The estimated cost of reconditioning the Umeriya School is Rs.122 and the funds for the purpose should be provided by the Military. As a matter of fact a list of damages has already been submitted to the Area Billeting Officer with a request that the funds should be made available to this Department. It frequently happens, however, that there is some delay in the issue of funds by the military authorities and it is to this delay the Director of Education refers in his correspondence.

65
GOVERNMENT OF PALESTINE

IN REPLY PLEASE QUOTE
No. 3308/6/12/PB

DEPARTMENT OF EDUCATION,
JERUSALEM.

/ September, 1939.

CHIEF SECRETARY.

Subject :- Repairs and reconditioning of
buildings after occupation by
the military.

very A.D. (2)
2.

I understand from the Area Billeting Officer that it is probable that the 'Umariya Government Boys' School which has been occupied for the last year by the military will shortly be handed back to the Public Works Department for use as a school.

2. Before this building can be used ^{again} as a school a considerable amount of reconditioning and repair will be necessary.

3. From experience in the past it has been found that there is an appreciable period of time between the date on which a building is handed back to Government and payment of the cost of reconditioning the building by the military is made to the Director of Public Works. During this period of time the building remains idle and no work is done on it by the Public Works Department.

4. To quote an instance, the Government rab College building was handed back to a representative of the Public Works Department by the military on the 29th May 1939. Although the Public Works Department sent an estimate of the cost of reconditioning to the military on the 13th June 1939, this estimate was not approved for payment by the military until the 14th August, and the

money was not actually received by the Public Works Department until the 31st August after many reminders and personal requests.

5. It was hoped that the Public Works Department would have been able to start reconditioning the building before funds for this work were actually received from the Army. I understand however that existing regulations did not permit of this and as a result, though the holidays began in the middle of July, work commenced only on 31st August and will, with difficulty, be completed before the boys return.

6. It is clearly incumbent on Government to maintain buildings under their control in fit condition for the purpose for which they are required, nor can the work of reconditioning possibly be evaded by any means.

No reason therefore can possibly exist for delaying that work while the question is being debated upon whom the expense shall fall. The only result of such delay is to deprive Government of the use of its own property for a longer period.

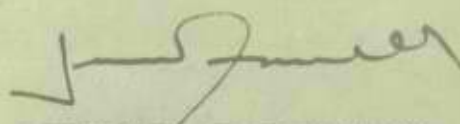

7. In the case of school buildings, delay in the execution of repairs is particularly objectionable when it disturbs the whole educational routine. All repairs should be carried out in the holidays, unless unavoidable necessity orders otherwise. An unavoidable necessity would be an impending and dangerous dilapidation. A mere discussion as to who shall pay cannot, as already shown, be any necessity for delay and a fortiori cannot be an

unavoidable obstruction to repairs being taken immediately in hand.

8. The summer holidays are drawing to a close and I shall accordingly be greatly obliged if you will authorize the Director of Public Works to put in hand immediately the reconditioning of the 'Umariya School.

9. I shall further be obliged if a general authorisation may be given to the Director of Public Works to take immediate steps to recondition and repair any Government school building which has been requisitioned for other use, as soon as the building is handed back to a representative of the Public Works Department.

Adjustment of payment for repairs and damage as between the Public Works Department and the previous occupants should if necessary be made at a later date, and the principle should be observed that no essential reconditioning should be held up while the final responsibility for payment is being settled.

Maintenance of School Buildings.

Reference:- Your No. 3 of 14.3.39.

40

The information asked for in my letter
No. 2420/1/PE of 9th March 1939 regarding maintenance
of school buildings is required in connection with
the calculation of the grant for the schools of the
Va'ad Leumi. As it is essential that the calculation
of the grant should be fairly accurate, I shall be
obliged if you will give me an estimate of the expendi-
ture likely to be incurred in 1939-40 on the maintenance
of school buildings. If it is not possible for you to
do so, will you kindly let me know the amount spent by
you on this service in 1938-39.

Subject : Maintenance of School
Buildings.

Reference: Your 2420/1/PR dated
9th March, 1939.

I have to state that no special
funds are being provided for School
Buildings next year.

Each case, when it arises, will
be considered by the District Engineer
concerned and if he considers the work
necessary and has sufficient funds at
his disposal to cover the cost, the
service will be carried out.

A.D.
R

E/68/37

31st October, 1938.

Director of Education.

HCO
I think steps
should be taken to
get a copy of the
letter at 4 in para 1
to you agree? *(initials)*

Subject : Replacement of school buildings occupied by the troops.

Reference: Your letters No. 321/47 dated 12-8-38, No. 3308/6/PE dated 12.9.38 and No. 3308/6/PE dated 5th October, 1938.

32

(Handwritten notes in left margin)
Have already asked L.S. to look up by hand. HCO. 2/11

2/11

(Handwritten note) Read & filed in 36/21. J.R.

I am directed to enclose for information a copy of my letter No. D/75/38 of the 9th August, 1938, to the Commissioner for Lands and Surveys, which enunciated the principle to be applied when additional cost is incurred by Government as the result of the military occupation of Government buildings.

Seen *(initials)*
3/11

2. It would appear to be equitable to apply the principle stipulated in that letter in the present instance; namely, that the Army should be asked to reimburse the additional expenditure incurred by Government as the result of the continued military occupation of the elementary secondary boys' school at Tulkarm since, although the school is not Government property - it is waqf property - it is given to Government rent free.

This, however, is a question which will have to be settled in consultation between Government and the General Officer Commanding; and it will be taken up by this office without delay.

The same presumably applies to the buildings listed in paragraph 4 of your letter No. 3308/6/PE of the 12th September.

3. I am to authorise you to select alternative buildings for hire (observing General Regulation 321), and to inform me of the expenditure involved on:-

- (a) rent; and
- (b) any alterations, etc., required, in accordance with General Regulation 322.

Government should not, however, be committed in any way to the actual hiring of buildings without further and express authority.

GOVERNMENT OF PALESTINE,
DEPARTMENT OF EDUCATION,
JERUSALEM.

12 September, 1938.

M. D. P. W.

(H. W. J. (1))

E.

CHIEF SECRETARY.

Subject :- Replacements of School
Buildings occupied by
the Troops.

I have taken up the general question of the occupation of school buildings with Col. Brunskill and I attach a copy of my demi-official letter dated 10th September which expresses my views on the subject.

2. To the Army, of course, I have stressed the value to public security of keeping as many pupils as possible employed in their schools. Other and more far-reaching considerations affecting the whole social progress of the Arab population should not be obscured in times of disturbances like the present. I would refer you to the following passages from the Report of the Royal Commission which support my opinion:-

"It is most regrettable that, after 17 years of Mandatory rule, the Government system is able to satisfy no more than half the Arab demand for education. Out of an Arab population of school-age estimated at about 260,700, only 42,700 approximately are at present accommodated in Government schools; and Arab witnesses calculate that about 85 per cent of the fellaheen are still illiterate. This is the more deplorable in that many Arab villages are willing, if only Government will do its share, to contribute towards the erection of school buildings. The inadequacy of the schools was one of the points stressed in anti-British propaganda in Palestine during the Abyssinian crisis." (p.337)

"we think that, considering the inadequacy of the existing provision for Arab education and the willingness of the Arabs to make sacrifices to increase it, the Administration should regard its claims on the revenue as second in importance only to those of public security." (p.342)

3. I now request that your authority may be given for (a) the acquisition of new hirings (when such is possible) in all cases where schools are occupied by troops, and
(b) their adaptation for use as schools.

Some funds are available for (a) I understand in the Rents votes controlled by the Director of Public Works. So far as I am aware no funds are available for (b).

4. The school buildings for which replacements are required are as follows :-

| | No. of pupils | No. of class sections | Approx. annual rental | Type of building | Remarks |
|-----------------|---------------|-----------------------|-----------------------|------------------|---|
| <u>Nablus</u> | | | | | |
| | | | £P. | | |
| Fatimiya G.S. | 510 | 11 | 250 | State Domain | Two large buildings will be required. |
| Khalduniya B.S. | 147 | 5 | 100 | Hiring | |
| Khadijiya G.S. | 150 | 5 | 120 | Hiring | |
| Ghazaliya B.S. | 285 | 6 | 130 | Hiring | |
| <u>Tulkarm</u> | | | | | |
| El.-Sec. B.S. | 473 | 12 | 250 | State Domain | Two large buildings will be required. |
| <u>Nazareth</u> | | | | | |
| El.-Sec. B.S. | 184 | 6 | 100 | State Domain | One large building is required. A building has been offered at a monthly rent of £P 7. The proposed building is good only as a temporary accommodation. |
| <u>Gaza</u> | | | | | |
| El.-Sec. B.S. | 954 | 19 | 560 | State Domain | Three or four large buildings will be required. |
| El. G.S. | 564 | 14 | 240 | State Domain | Two buildings will be required, one of which is now in the course of being acquired to accommodate the classes which were previously accommodated in the old block, which has been condemned and evacuated. |
| Total | 3,265 | 74 | 1,550 | | |

The cost of providing latrines varies but an allowance of approximately £P 100 for each hiring could probably be made to suffice as a temporary expedient. Essential structural alterations, such as the removal of partitions, and the provision of a drinking water supply, may be estimated very roughly at £P 50 per hiring.

1. The first section of the report is devoted to a general statement of the facts and circumstances of the case. It is in this section that the reader is first introduced to the subject matter of the report. The facts are stated in a clear and concise manner, and the circumstances are described in a way that is easy to understand. This section is the foundation of the entire report, and it is essential that it be written in a way that is both accurate and readable.

2. The second section of the report is devoted to a detailed analysis of the facts and circumstances of the case. In this section, the reader is presented with a thorough examination of the evidence, and the various theories and hypotheses that have been advanced to explain the facts. The analysis is presented in a logical and systematic manner, and the reader is able to follow the reasoning of the writer. This section is the heart of the report, and it is in this section that the writer's conclusions are based.

3. The third section of the report is devoted to a summary of the findings of the investigation. In this section, the reader is presented with a clear and concise statement of the results of the investigation, and the conclusions that have been reached. The summary is presented in a way that is easy to understand, and the reader is able to see the overall picture of the case. This section is the final part of the report, and it is in this section that the writer's conclusions are presented.

4. The fourth section of the report is devoted to a discussion of the implications of the findings of the investigation. In this section, the reader is presented with a thorough examination of the various factors that may have contributed to the results of the investigation, and the various ways in which the findings may be applied. The discussion is presented in a logical and systematic manner, and the reader is able to see the broader context of the case. This section is the final part of the report, and it is in this section that the writer's conclusions are presented.

5. The fifth section of the report is devoted to a conclusion. In this section, the reader is presented with a clear and concise statement of the overall findings of the investigation, and the conclusions that have been reached. The conclusion is presented in a way that is easy to understand, and the reader is able to see the overall picture of the case. This section is the final part of the report, and it is in this section that the writer's conclusions are presented.

6. The sixth section of the report is devoted to a list of references. In this section, the reader is presented with a list of the various sources of information that have been used in the report. The references are listed in a logical and systematic manner, and the reader is able to see the sources of the information. This section is the final part of the report, and it is in this section that the writer's conclusions are presented.

7. The seventh section of the report is devoted to a list of appendices. In this section, the reader is presented with a list of the various documents and materials that have been used in the report. The appendices are listed in a logical and systematic manner, and the reader is able to see the materials that have been used. This section is the final part of the report, and it is in this section that the writer's conclusions are presented.

8. The eighth section of the report is devoted to a list of footnotes. In this section, the reader is presented with a list of the various footnotes that have been used in the report. The footnotes are listed in a logical and systematic manner, and the reader is able to see the footnotes that have been used. This section is the final part of the report, and it is in this section that the writer's conclusions are presented.

9. The ninth section of the report is devoted to a list of index. In this section, the reader is presented with a list of the various index that have been used in the report. The index are listed in a logical and systematic manner, and the reader is able to see the index that have been used. This section is the final part of the report, and it is in this section that the writer's conclusions are presented.

10. The tenth section of the report is devoted to a list of bibliography. In this section, the reader is presented with a list of the various bibliography that have been used in the report. The bibliography are listed in a logical and systematic manner, and the reader is able to see the bibliography that have been used. This section is the final part of the report, and it is in this section that the writer's conclusions are presented.

| CENTRAL REGISTRY |
| To No. 3 |
| 12 MAY 1938 |
| P. O. Box, Jerusalem |

REPLIED 19 27

May 17th, 1938.

Director of Education.

71-3/12

Subject : Standard plans for School Buildings.

Reference: Your 1640/PE of 31-3-1938.

I refer to your circular letter No. 1640/PE of 24-1-1938 addressed to your District Inspectors of Education, with copies to my District Engineers, and subsequent relevant correspondence which has passed between yourself and this Department.

2. Regarding the directions contained in the circular which purport to authorise modifications and additions to plans of buildings prepared and issued by the Director of Public Works, I hold the view that these directions infringe upon the functions and responsibilities of the Director of Public Works as defined in General Regulations.

3. I do not wish now to enlarge upon this matter as I am anxious to eliminate sources of friction and to avoid anything which might detract from smooth and harmonious relations in the necessary contacts between two departments. I trust that you will appreciate my attitude in this and should therefore be glad if you would take steps to correct an impression, even if such impression be erroneously held, that the context of the circular tends to override my authority and responsibility in the matter of the planning and construction of buildings on behalf of Government.

A.D.3.

9A
Subject : Circular 1640/PE dated 24.1.1938
issued by the Director of Education.

In issuing such a circular without the prior approval of the Director of Public Works the Director of Education has, I consider, exceeded his authority and his competency.

The plans in question are issued under the hand of the Director of Public Works. In directing that the plans be changed and, according to 3(b) that something be added to the building as designed, the Director of Education has overridden the authority of Director of Public Works and his responsibility as defined in General Regulation 301.

By sending the circular to the District Engineer it is implied that Director of Education seeks to countermand instructions conveyed by Director of Public Works to the District Engineer through the authority of his signed plans.

This high-handed action of the Director of Education is so challenging and if permitted to pass, so serious a precedent that I strongly advise the Director to adopt a strong line of resistance and if necessary put the matter to Government.

It seems that this effort of the Director of Education is a device to present us with a fait accompli inasmuch as I find he has already dictated to us upon the orientation of school buildings and his dictatorial decree was resisted at the time. Furthermore the Director of Education has caused and continues to cause much trouble in attempting to dictate on matters of planning and

designing. He is entitled to give his views and opinions, and those, as in all cases of Heads, would be and always are attentively considered and discussed - they are often very useful and suggestive to the Architect. He is entitled to submit constructive criticism but I think Director of Public Works should make it quite clear that he is not entitled to dictate upon matters outside his competence and for which this Department, through D.P.W. are finally responsible to Government.

Detailed Comments on the Circular.

Paragraph 3 (a). Director of Education's instructions are contrary to the accepted principles of orientation of class rooms.

These principles, recommended by the Board of Education and adopted in England, were also adopted by the Department of Education here, and schools to date have been built accordingly.

The Director of Education orders the door to be placed on the south. There is no lobby to give shelter from or to break the force of the winds and rain - if so placed on the south; this, the Director of Education realises, so he orders a ramsheekle "lean-to" to be built against the south wall, even giving details for its design and materials. (Using technical terms he does not understand and which are wrong).

If windows are provided in the south wall the room will be unbearably overlighted and the glare intolerable - in my opinion it is already overlighted.

The through ventilation already provided is ample. Director of Education directs that additional windows for further ventilation be added and then explains that during lessons they can be kept shut; that is to say, just when the ventilation is needed.

Paragraph 4. My remarks regarding orientation apply here.

Subject :- Use of Standard Plans for
School Buildings.

In all cases where school buildings are to be erected, even though the plan is a 'standard' one a sketch plan showing the proposed new buildings and their orientation and "lay-out" on the site in relation to existing buildings or natural features should be submitted to this office for approval before tenders are called for or building commences.

2. In the majority of cases it will be found desirable to erect new school buildings on one of the two undermentioned types of approved plan:-

(a) Standard Village School (Concrete Roof Type). P.W.D. Headquarters Drawing No.H/1278 dated 27th October, 1934.

(b) Standard School (Intermediate Type). P.W.D. Headquarters Drawing No.B/1454/4 dated 6th October, 1937.

3. As regards (a) above, "Flat roofed village type", this type of plan will normally be followed for all village schools where large sites can be procured without great cost or difficulty and there is consequently no necessity to contemplate the subsequent provision of a second storey. Rooms can be added as required on the ground floor.

The following important points however should be noted:-

(a) Normally, if the site allows, the door of the building should face south with the main lighting from the north. On the abovementioned village school drawing the words "East elevation", "West elevation" and "North and South elevation" should be altered to read "South Elevation", "North Elevation" and "East and West Elevation" respectively, and the words "The building should be so placed that the prevailing wind passes transversely across the classroom" should be deleted.

Handwritten notes and calculations, including the date 12/1/18 and the number 12.5.

Main body of the document containing several paragraphs of handwritten text, which is mostly illegible due to fading and bleed-through from the reverse side.

(b) It is very desirable that two windows should be provided in the South wall under the clerestory windows and that a verandah or shelter of light construction should be erected against the south wall. This verandah need not be of brick or masonry construction; tiles or asbestos roof on a wooden frame will usually suffice as a protection against sun and rain. The verandah roof should spring from the wall just below the ventilators or clerestory windows.

With such a verandah on the south side it is improbable that shutters would be required either on the south or north windows, none of which would be exposed to the direct rays of the sun.

The object of these two additional windows on the south side is to allow a through current of air to pass across the room in the intervals between lessons. During lessons if the breeze is too strong the windows can be closed on the windy side.

4. As regards (b) in paragraph 2 above, "Intermediate Type", this type of plan will be followed in towns or large villages or where large sites cannot easily be obtained so that a second storey may be advisable later.

So far as the site allows the main classroom block should, like the village schools, have its verandah on the south side with the main lighting on the north.

Sites for new schools of this type should normally be of not less than 5 dunams. Further information on the selection of sites and the placing of buildings thereon is contained in my 1640/2/PE of 14th January 1938.

|--|---|---|---|---|
| <u>XXVIII - PUBLIC WORKS EXTRAORDINARY</u> | | | | |
| 18 | Special repairs to Girls' School, Acre | 700 | - | Work held up under paragraph 2(a) of Chief Secretary's Circular No.111 of 18-11-1937. |
| 19 | Improvements to Boarding Section at Boys' School, Beersheba. | 150 | 150 | |
| 20 | Additional accommodation, Boys' School, Beersheba. | 930 | - | Work held up under paragraph 2(a) of Chief Secretary's Circular No.111 of 18-11-1937. |
| 21 | Additions to Boys' School, Bireh. | 630 | 630 | |
| 22 | Playground for Elementary Boys' School, Gaza. | 950 | - | Negotiations with regard to this item are conducted by Director of Education. His letter No. 397/19/1 of 11-10-1937 to District Commissioner, Southern District, refers. |
| 23 | Additions to Boys' School, Gaza. | 7 | 7 | |
| 24 | Government Trade School, Haifa. | 5,077 | (x) | (x) LP.1,482 spent to-date. Further expenditure cannot be estimated pending submission of bill by Mr. Holliday. |
| 25 | Equipment for Government Trade School, Haifa. | 1,340 | 1,340 | |
| 26 | Extension of Playgrounds, Girls' School, Jenin. | 4 | 4 | |
| 27 | Construction of nucleus of Girls' School, Jenin. | 750 | - | The site has not yet been selected and there is therefore little likelihood of any expenditure being incurred this year even if this item is approved. |
| 28 | Cost of site, Police Training School, Jerusalem (used for Government Arab College). | 643 | (xx) | (xx) The sum of LP.643 is provided for land acquired several years ago. It is however impossible to state if payment will be effected this year. |
| 29 | Formation of Tennis Courts, Playing Fields, etc. at the Government Arab College, Jerusalem. | 1,790 | 1,790 | |
| 30 | Additions to Salahiya Boys' School, Nablus. | 900 | - | The sum which could be spent this year depends on the date on which authority to proceed with this service is given. Director of Education's letter No.234/38/1 of 12-10-1937 refers. |
| 31 | Extension of Grounds, Boys' School, Ramle. | 529 | (xxx) | (xxx) For land already acquired. It is however impossible to state if payment will be actually effected this year. |
| 32 | Construction of Elementary Boys' School, Safad. | 295 | 295 | |
| 33 | Additions to Elementary Boys' School, Safad. | 1,410 | - | The sum which could be spent this year depends on the date on which authority to proceed with this service is given. |
| 34 | Construction of Town Schools. | 42,500 | 9,000 | |
| 35 | Construction of Workshops at three Boys' Schools. | 830 | 830 | |

All correspondence should be addressed to:

Please discuss with
me, NY

30 November, 1937. 1/12.

Director of Public Works,
Jerusalem.

Subject :- Estimates 1937 - 38.

In connection with the revision of the
estimates for the current financial year, I should
be obliged if you ^{would} ~~will~~ furnish me as soon as
possible with a statement of:-

- a) The actual non-recurrent expenditure
to-date on buildings for Government Schools.
- b) The estimate of non-recurrent expenditure
likely to be incurred on such buildings during the
coming four months of the financial year.

The statement should distinguish between:

- (i) Extraordinary expenditure (major works)
- (ii) Expenditure from loan funds.
